The TruckMaster offers a quality, cost saving and compliant solution backed by excellent technical and customer service support.

Available in 53 and 114 gallons, the TruckMaster suits a variety of applications including agricultural, construction and forestry. Built from high-quality polyethylene all tanks are resistant to structural damage, changing weather conditions and UV radiation.

TruckMaster® Features and Benefits

Secure Lockable Lid

All equipment is stored under the lockable lid for increased security.

Efficient Transportation

The 114 gallon model features an internal baffle wall minimizing the movement of liquid; making both the truck and load more stable when in transit.

Easy to Lift

When full, the portable tanks can be easily lifted with its specifically designed lifting eyes or by using a forklift.

Environmental Protection

The specially designed area under the lockable lid houses the equipment in a secure leak-proof area. This eliminates the risk of dripping fuel often encountered by an external retrofitted nozzle and hose.

Power and Safeguard your Business:
