

CS600

With its curvy design, the Call Blocker Mobile is secure to hold and easy on the eye with its distinctive but discrete big-button design. The Call Blocker Mobile phone is easy to use and has an enhanced feature set in comparison to other big-button mobiles.

Call Blocking

The CS600 has a built-in Black and White list function. The Black List function allows users to block nuisance callers at the touch of a button. The White List function can be programmed to allow only certain numbers through (a great feature for vulnerable adults).

Photo Contacts

The large colour screen and photo contacts sets this phone apart from its rivals. The photo contacts feature allows the user to dial using the image of a person, rather than a number (useful for the visually impaired).

Intelligent SOS Emergency Assist

Press the SOS/Panic Button and the first five programmed numbers will be called and SMS messaged in order. It will continue to call until it is answered.

Main Features
