

Paint-by-Number Instructions

Thank you for purchasing a paint-by-number kit from Bison Hill Stonecrafts. *We would absolutely love it if you could take some time to let us know what you think by writing a review!* Below are some tips and tricks to ensure you enjoy the experience instead of smashing the slate to bits.

1. Don't worry too much about the lines, they are just guidelines. In the end this is your personal painting and no one will notice the places you think you "screwed up".
2. These are water-based paints, use plain tap water in a cup to clean the brush in between colors.
3. The approach we recommend is to do one color at a time with light coats. Then go back over each color with a second coat and blend as required.
4. This is going to take longer than you expect, make sure to keep all the paints closed when not in use so they don't dry out. Also don't be afraid to walk away and come back another day, you don't have to finish this in one sitting.
5. Watch some videos on Youtube of paint by number tips if you need some reassurance. A glass of wine or beer makes it easier to get started!
6. Have fun and don't forget to sign your painting! Send us a photo of your masterpiece too!
