CEFL42FH

Change the look of an entire room simply by hanging the CEFL42FH on the wall. This electric fireplace pumps out 5,000 BTU's and will easily heat a room that is up to 400 sq. ft. Control heat output, flame height, brightness, and flame color with the touch of a button. There is no need for gas fitters or other expensive installation professionals. This electric fireplace won't intrude on your space thanks to the ultra slim, 5-inch depth. Placing Continental's newest Wall Hanging Electric Fireplace in any room will make a huge impact. Where will you hang yours?

CEFV38H

Continental's CEFV38H Vertical electric fireplace is a stunning statement piece for any small or large area without the need for venting. Never sacrifice your personal style again by giving yourself ample choices! Customize your fireplace by choosing from one of three color settings, for not only the CRYSTALINE™ ember bed but the back lit NIGHT LIGHT™ as well. Enjoy the convenience of a “Hang, Plug and Go” fireplace or choose a partially recessed installation for a sleeker low-profile look. Whatever you do, make sure to sit back, relax, remote in hand and enjoy the memories around your vertical electric fireplace.

Paintable Cord Cover (included)

Remote Control (included)

QUALITY PROMISE

All Continental® products are built to the strictest quality standards and only the highest grade materials are used. The computerized production processes, pride in workmanship and serious commitment to our achieved ISO9001-2008 certification, ensure many years of dependable performance.

VERSATILE INSTALLATION

Install in your home above or below grade, in any room even in bedrooms, bathrooms and kitchens. Direct vent models can be vented up to 20 feet horizontally through a wall, 40 feet vertically through the roof or below grade with a periscope. For all direct vent fireplaces we offer the smallest, architecturally pleasing vent terminal in the industry.

MAXIMUM EFFICIENCY

Our sealed combustion technology in our direct vent models uses outside air for combustion eliminating heat loss and cold drafts associated with conventional fireplaces. All Continental® models are designed to maximize efficiency levels with special heat retaining components.

CONVENIENCE

If all the conveniences of gas fireplaces aren't enough, enjoy full relaxation with Continental's remote controls. Available with an easy-to-read backlit digital readout of the room temperature and includes a child proof safety lock.

A RELIABLE ECONOMICAL HEATING SOURCE

Continental® products can save home heating costs by as much as 30% (Zone Heating by heating the rooms you use most) and provide reliable heat during power failures. No power? No problem! Continental's built-in millivolt system or electronic ignition with battery back-up requires no electricity to light or operate.

SAFETY FEATURES

100% SAFE GUARD™ gas control system automatically and quickly shuts off the gas supply for your peace of mind.

HEAT TRANSFERRING CERAMIC GLASS

Ceramic glass provides an excellent temperature transfer allowing maximum heat to radiate into the room. Some models use heat resistant tempered glass.

REALISTIC CERAMIC FIBRE LOGS

Continental's configuration of realistic logs create a cozy and natural wood burning atmosphere.

RELIABLE BURNER SYSTEM & ADJUSTABLE FLAME

Our advanced YELLOW DANCING FLAMES® provide maximum heat and flame pattern. For less heat, simply reduce the input with the built-in flame/heat adjustment for maximum comfort and efficiency.

ENVIRONMENTALLY FRIENDLY

Clean burning, convenient natural gas or propane provides an environmentally safe energy source - indoors and outdoors. Continental® products are designed to provide an environmentally friendly energy source.

ENERGUIDE - A Canadian efficiency standard based on frequent, short start-up and cool-down cycles. All appliances sold in Canada are subject to this EnerGuide rating system. AFUE - A US efficiency standard (Department of Energy) based on extended on/off cycles, more typical of fireplace usage. STEADY STATE - Reflects the highest possible overall heating efficiency. Years of research, design and testing have enhanced optimum performance allowing Continental products to achieve some of the highest heater rating efficiencies on the market. Our products continuously surpass industry standards not only in appearance but in efficiency and performance.

Consult your owner's manual for complete installation instructions, accurate framing dimensions and proper clearances to combustible materials. Installations shown may not be accurate to code. Check all local and national building codes and gas regulations. Products may not be exactly as shown. Flame height and activity is influenced by varying vent configurations and may not appear as shown. All specifications are subject to change without prior notice due to on-going product improvements. BTU's listed in brochure reflect natural gas applications. Continental is a registered trademark of Wolf Steel Ltd. © Wolf Steel Ltd.
