

# PROVEN PERFORMANCE RESULTS

Attribute	EvenGLO®		Top Competitor
	High	Low	
Operation	Two-Stage		Single Stage
BTU/HR	53,000	46,000	50,000
Heated Area 63° F and Higher*	152.7ft <sup>2</sup>	137.9ft <sup>2</sup>	96.6ft <sup>2</sup>
Amount of Energy Used (Btu/ft <sup>2</sup> )	351	329	531

Note: Independently tested (Source: <http://www.fishnick.com/publications/appliancereports/heaters>)  
 \*The useful output is specified as the area under and around the heater having a mean radiant temperature rise of at least 3°F in a design environment of 60°F
