

Flood light installation instructions

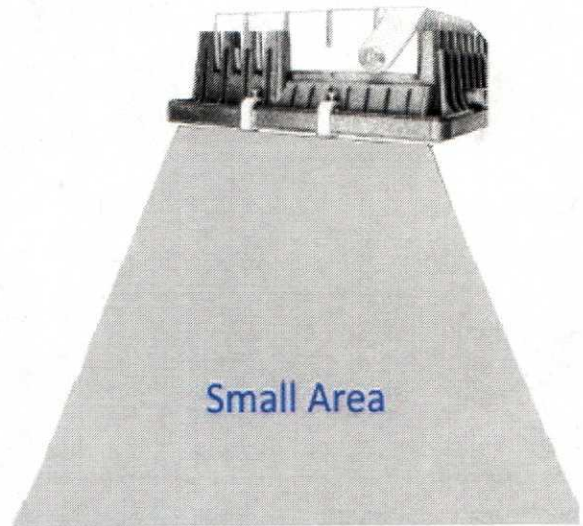

WARNING! TURN OFF ALL POWER BEFORE ATTEMPTING ANY ELECTRICAL WORK!

1. Securely install mounting bracket on surface and attach light to bracket.
2. Angle light outward as shown below. Pointing the light straight down will result in a small coverage area.

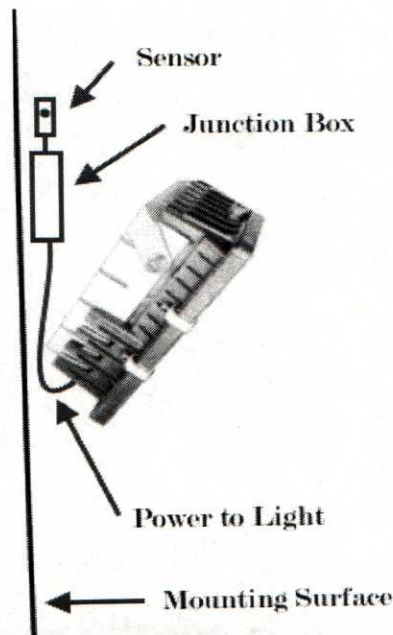

Right

Wrong

3. If you have ordered the optional dusk-to-dawn sensor, read and follow all instructions included with the sensor. Make sure the sensor is not in the line of the light projected- preferred location is above the light (see picture below).
