

## Printing Instructions

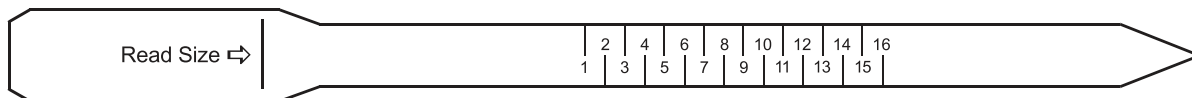

1. To obtain accurate measurements, please download this PDF to your computer and print this document at 100 percent size.
2. Verify the page scale setting prior to printing by checking your printer dialog box. Under the page scaling option, select “none” or uncheck the box for page scaling.
3. Compare a ruler or U.S. Quarter with the guides on the right to ensure your printed document is the correct size. The marks of the ruler should match precisely and the U.S. Quarter should completely fill the circle shape.

## 1. Paper Method

(Best results when hands are warm)

- Print and cut out ring sizer. Cut small slit that is marked with an arrow.
  - Slip pointed end through the slit, numbers facing out.
  - Slide sizer down to the base of your finger.
  - Secure the ring sizer by pulling each end snugly around your finger like a belt.
  - Your approximate ring size should be the number that appears where it says “Read Size”.
- Measurements resulting between two whole numbers can be considered a half size.

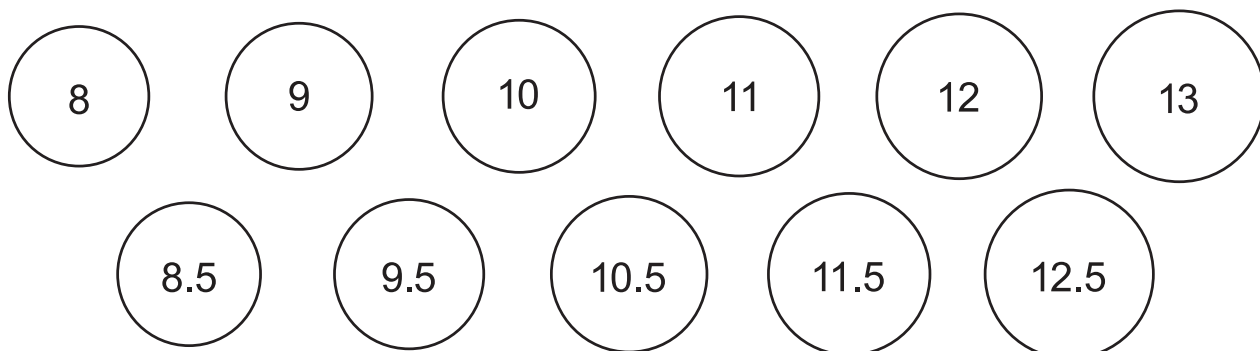

## 2. Ring Method

(Tip: Close one eye for best results)

An alternative method is to place a ring on a circle within the chart below. The correct circle size should fit against the inside edge of the ring.

Place a ring on the circles below to check your ring size.

**We recommend a jeweler's finger sizing tool as the most accurate method.**
