

FOXBAT-8

NIGHT VISION BI-OCULAR

The AGM FoxBat-8 night vision bi-ocular is the perfect tool for long-range observation. The FoxBat-8 combines a compact catadioptric objective lens, single high quality image intensifier tube with image beam splitter, double eyepiece and reliable electronics.

AGM FoxBat-8 provides a sufficient and durable solution for long duration viewing sessions and long range observation. This night vision bi-ocular is the ideal choice for border security, base perimeter observation, drug interdiction, intelligence collection, and recreational use .

Operators will experience the benefits of crystal-clear images combined with professional, fast multicoated optics. The AGM FoxBat-8 has a tripod mounting option to provide relief from fatigue.

The FoxBat-8 is a magnified, high-grade night vision device built around a Gen 2+ or Gen 3 high-performance image intensifier tube. The high-light shut-off feature ensures that the high-quality image intensifier tube is protected from over-exposure. The FoxBat-8 is powered by two AA batteries and its typical operating time on a single battery load is up to 40 hours of continuous use.
