

DOES YOUR POUCH LEAK? TRY MARLEN.

If you're experiencing pouch leakage, a flush or retracted stoma may be the cause. Using a pouch with a deep convex flange may help. Marlen offers the largest selection of pouches and flanges available to provide the best fit for your unique stoma.

UltraMax™ Deep Series

Unique flange petal design offers flexible, deep convexity for flush or retracted hard-to-fit stomas.

~~Problem~~
Solved

FEATURES:

- Hydrocolloid barrier **absorbs moisture** and **adheres to moist skin** making it a good option when skin breakdown is present.
- **No tape border** to contribute to further skin breakdown.
- Fastener with window.
- **Pre-Cut** and **Cut-to-Fit** available.
- **Drainable, Closed,** and **Urostomy** pouch options.

ALSO AVAILABLE:

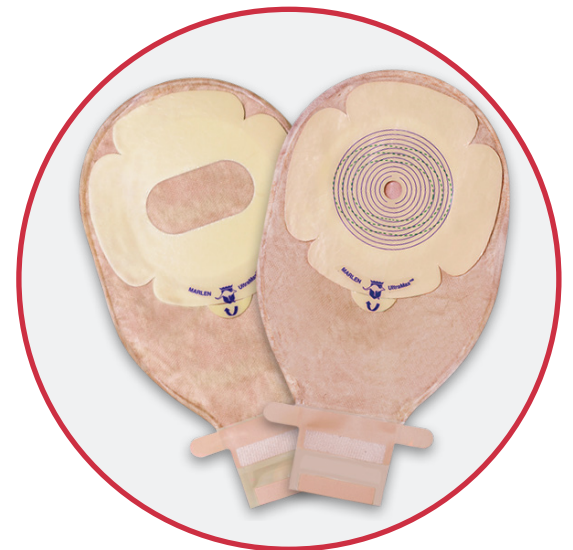

MegaMax™ Series

Larger pouch, larger flange, larger cutting surface. Ideal for recent post-op cases with skin folds.
