SIGN SYSTEMS

All door plates listed are available in custom lengths to suit your requirements. The prices listed are for the popular sizes which we make in bulk and carry in stock on the shelf. Custom sizes attract set up charges which apply to each order. They can also be supplied with double sided tape applied at an additional nominal cost.

## DP100-S

The single line door plate is ideally suited for commercial offices, hospitals or work places where a simple slimline nameplate is required.

|  | 35mm | 42mm | 50mm | 63mm | 84mm | 100mm |

| 600mm |  | ✔ | ✔ |  | ✔ | ✔ |

## DP100-PI

The paper insert door plate accepts a paper strip which mounts behind a clear plastic face plate. These signs are widely used in large offices where it is necessary to regularly change names.

|  | 35mm | 50mm | 105mm |
|---|---|---|---|
| 210mm | ✔ | ✔ | ✔ |
| 297mm | ✔ | ✔ | ✔ |
| 400mm |  |  | ✔ |

## DP100-SP

This model incorporates a sliding plate which covers over half the sign. The sliding plate enables the sign to display two different messages. For example "Vacant" or "In Use" is a common application. The sliding plate covers whichever message is not needed.

| 400mm | ✔ | ✔ |

## DP100 -EL

This sign accepts a strip of standard engraving laminate at 1.2mm or 1.5mm thick. Engraving laminate is available in a wide range of colours and finishes, such as wood grain or marble. Sign companies generally supply their own engraving laminate strip. We only supply SNA aluminium inserts.

# SignLink Dernier Door Plate Architectual Specifications

## DP100-S

This is model is comprised of an extruded aluminium face plate with a magnetic strip mounted in the back of the face plate. It mounts into a signwhite backplate which has a verticle return on boh left and right hand ends. These returns enclose the ends of the sign.
The standard finish is a sand blasted satin natural anodised silver which gives the signs a very consistant metalic luster, free from die lines and extrusion marks.

## DP100-PI

This is model is comprised of an extruded 'C' channel which accepts a plastic insert cover plate, enabling signs to be printed on paper and displayed behind the cover plate. The 'C' channel mounts into a signwhite backplate in the same ways as the DP100-S model. The standard finish is satin natural andosied silver.

## DP100-SP

This is model is comprised of an extruded 'C' channel which accepts satin natural anodised silver aluminium insert which is half width of the 'c' channel. The aluminium insert slides to the left or right to allow one of two different messages to displayed. The 'C' channel mounts into a signwhite backplate in the same way as the DP100-S model.

## DP100-EL

This is model is comprised of an extruded 'C' channel which accepts an aluminium or engraving laminate insert. The inster is the same length as the 'C' channel. It mounts into a signwhite backplate in the same way as the DP100-S model.

## DP100-CSP

This model is a combination door plate which incorporates standard name plate and a sliding plate below. This sign is a combination of the DP100-S and DP100-SP models.

## DP100-CPI

This model is a combination door plate and paper insert plate. It is comprised of a standard name plate at the top with a paper insert below. This sign is a combination of the DP100-S and DP100-PI models.
