

Split Batten Range

Designer

Introducing the SignLink Split Batten Range

Innovation.

Our products were developed following many years of experience in the architectural sign industry. Through this experience, we saw a need for a series of flexible sign systems that could be easily changed and updated as required.

Accordingly we have developed the SignLink Split Batten range which provides an ideal mounting mechanism for a wide range of wall mounted items. These include but not limited to: decorative timber-panels, cabinets, mirrors, signage, shelving and joinery products.

A major benefit of the SignLink Split Batten system is the advantage of being able to readily hang and remove heavy items without causing undue wall damage.

Benefits.

SignLink Split Battens are all aluminium robust extrusions, capable of supporting heavy items. The benefits of these innovative systems are;

- Allows installation to be done with the minimal of manpower and time;
- Minimises the mounting distance off wall;
- Shadowline reduced;
- Weather resistant characteristics of the aluminium makes the SignLink Split Batten system suitable for both internal and external use;
- Secure hanging systems allow items to be removable or permanently fixed preventing theft.

Toxicological Information.

Cutting MDF requires numerous pieces of safety equipment due to possible exposure to dangerous elements including; wood dust, formaldehyde & paraffin wax. Such exposure is known to cause damage to skin, eyes and respiratory system. Our aluminium system have no toxicological effects.

Overview.

SignLink aluminium LB Split Batten system is ideal when a minimal shadow line is needed.

It allows an item to be mounted 5mm from the mounting wall.

The interlocking shoulders lock the item place securely allowing it to support heavy loads.

The LB Split Batten system can be cut to size and only requires one man for installation.

SignLink Split Batten LB

Overview.

SignLink Aluminium HD Split Batten is perfect when a hanging system is required that requires security. The HD system can allow an item to be removable or to be permanently fixed. As all other SignLink Split Batten systems, the HD shoulders interlock together preventing movement when under load.

The HD Split Batten is very robust which is ideal for indoor or outdoor environments.

Overview.

The SignLink aluminium HD-3 Split Batten system is designed as a 8mm shadow set spacing bar. From its side profile, the HD-3 conceals the fixing mechanisms, giving an architectural finish to the item being hung.

The interlocking shoulders lock the item in place securely allowing it to support heavy loads.

The HD-3 Split Batten system can be cut to size and only requires one man for installation.

SignLink Split Batten HD-3

Length	Finish
4800mm	Satin Black Anodised

This Batten requires a length of HD Split Batten for the wall only. The HD-3 system is best used around the perimeter of the item, hiding any fixings on the side profile.

Split Batten HD Architectural Specifications

The SignLink Heavy Duty split batten is comprised of two, self mating, interlocking, aluminium blades. Each blade has a semi circular channel connection which performs as a silicon joint for permanent connection or as a screw flute allowing the blades to lock together or unlock as required.

Once installed the space items 8.5mm off the background wall. The blades have a rounded bull nose so that they lock together without slippage once they are under load.

Split Batten LB Architectural Specifications

The SignLink Little Brother split batten is a lightweight wall mount fixing system comprised of two aluminium interlocking blades.

Once mounted in position they space items 5mm off the background wall.
