4. FIRST AID MEASURES

INHALATION: Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. If not breathing, give artificial respiration and have a trained individual administer oxygen. Get medical attention immediately

EYES: Immediately flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention and monitor the eye daily as advised by your physician.

SKIN: Wash with soap and water. Get medical attention if irritation develops or persists.

INGESTION: Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS. Induce vomiting as a last measure. Induced vomiting may lead to aspiration of the material into the lungs potentially causing chemical pneumonitis.

MOST IMPORTANT SYMPTOMS/EFFECTS (ACUTE AND DELAYED): May cause an allergic skin reaction Causes serious eye irritation

5. FIRE FIGHTING MEASURES

SUITABLE EXTINGUISHING MEDIA: Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid.

UNSUITABLE EXTINGUISHING MEDIA: None known

SPECIFIC HAZARDS ARISING FROM THE SUBSTANCE /MIXTURE: Material may be ignited if preheated to temperatures above the flash point in the presence of a source of ignition. Combustible at elevated temperatures

HAZARDOUS COMBUSTION PRODUCTS: Carbon Oxides, nitrogen oxides (NOx), Carbon monoxide

ADVICE FOR FIREFIGHTERS: Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Flammable component(s) of this material may be lighter than water and burn while floating on the surface.

6. ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS, PROTECTION, AND EMERGENCY PROCEDURES: No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS

METHODS AND MATERIALS FOR CONTAINMENT AND CLEAN UP: No special spill clean-up considerations. Collect and discard in regular trash.

7. HANDLING AND STORAGE

PRECAUTIONS FOR SAFE HANDLING: Mildly irritating material. Avoid unnecessary exposure. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Ground and bond containers when transferring material Use spark-proof tools and explosion-proof equipment Do not get in eyes, on skin and clothing Wash thoroughly after handling Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. As with all chemicals, good industrial hygiene practices should be followed when handling this material.

HANDLING AND STORAGE: Store in a cool dry place. Isolate from incompatible materials. Keep container closed when not in use Do not store near combustible materials Keep away from heat, sparks, and flame Store in a cool place in original container and protect from sunlight.

MATERIALS TO AVOID: Oxidizing agents, Bases, Acids, Strong oxidizing agents, Reducing agents, Strong acids, Strong bases

8. EXPOSURE CONTROLS\PERSONAL PROTECTION

OSHA permissible exposure limit (PEL), American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV), and any other exposure limit used or recommended by the chemical manufacturer, importer, or employer preparing the safety data sheet, where available:

No data available

APPROPRIATE ENGINEERING CONTROLS: No exposure limits exist for the constituents of this product. Use local exhaust ventilation or other engineering controls to minimize exposures and maintain operator comfort.

Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits

Facilities storing or using this material should be equipped with an eyewash and safety shower.

Explosion proof exhaust ventilation should be used.

Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910.

PERSONAL PROTECTION METHODS

RESPIRATORY PROTECTION: No respiratory protection required under normal conditions of use. Provide general room exhaust ventilation if symptoms of overexposure occur as explained Section III. A respirator is not normally required. A supplied air type respiratory will be required. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator.

EYE PROTECTION: Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available. Wear goggles and a Face shield.

SKIN PROTECTION: Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene and wear a barrier cream and/or impervious surgical style gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield.

WORK/HYGIENIC PRACTICES: Wear protective gloves/protective clothing/eye protection/face protection. Contaminated work clothing should not be allowed out of the workplace. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.

OTHER PROTECTIVE EQUIPMENT: Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield.
Wear goggles and a Face shield.
