

MIXING & APPLICATION INSTRUCTIONS

PRODUCT: DooRestore

Bottle of
DOORClean
Concentrate

1 Gallon
WATER

Mix chemicals and
water in Reusable
Bucket

Mixing - DOORClean Contrate:

Mix entire contents of bottle of DOORClean Concentrate with 1 gallon of water in reusable bucket (included with Deluxe and Super Kits).

Remove Oxidation and Clean Doors:

Dip scrubbing brush in DOORClean mixture and scrub door oxidation and dirt.

Rinse and Repeat Scrubbing In Necessary:

Use garden hose with nozzle to rinse thoroughly. If using a power washer, avoid removing paint.

***Do NOT allow DOORClean to dry on doors.
Rinse as you go.***

Repeat scrubbing if necessary. For tough water spots use a calcium remover such as CityRestore's Extreme Prep and a citrus cleaner for marks and tape glue if necessary.

Please read all Safety & Application instructions included with or printed on product labels. Go to cityrestore.com/pages/instructions to view a quick "how-to" video.

MIXING & APPLICATION INSTRUCTIONS

PRODUCT: DooRestore

Thoroughly Dry Doors:

Dry doors with lint-free towels. We recommend micro-fiber cloth.

Open and Close Doors to make sure water is out of door seams. Wipe doors with a clean damp towel to remove water spots, streaks and oxidation.

Wipe doors with a clean damp towel to remove any remaining water spots, streaks and oxidation.

Restore and Protect Doors:

Wear protective gloves when applying. Spray DOORestore in small areas directly onto door, hardware and threshold. Wipe small sections with applicator pad.

Works best when applied to cool doors and dries fast. Work quickly and don't allow applicator pad to dry out.

DooRestore Product and Kits

An 8oz Bottle each of DOORClean and DOORestore is enough product to restore typical "2 Car Garage Doors". Kits are available with product only or including all necessary applications tools (applicator pad, reusable bucket, cleaning brush, gloves).

DooRestore will restore sun-damaged paint, simulated wood, fiberglass, acrylics, plastics and metal, while also protecting with our UV block additive. Use on Entry Doors, Metal Lights, Shutters, Road Signs and more.
