Operational Features & Benefits

- Its six operating modes (Mixed / Sort / Count / Orientation / Face / Dispense) make this unit versatile and suitable for a wide range financial tasks

- Counts mixed value bills & detects counterfeit bills

- Rejection pocket allows for a continuous and smooth operation

- Connect your unit to your PC via Wi-Fi or cable to export all of your counting data

- Shows a detailed breakdown of each count including serial numbers

- Dual user operation saves money and space allowing two operators to work with the same equipment

- Large hopper capacity of up to 600 bills

- Ideal for central and commercial banks, cash-in-transit companies, retailers, casinos and more

User Interface/Display

- Simple and friendly user interface with a high resolution 3.5" LCD touch screen display

- Performs self-check procedure

- On-screen notification of suspicious bills, errors and more

The ABCashroom software is the perfect add-on for the AB7800. Free and optional to download with the purchase of your unit. Organize historical data of all your stored counts. Customize reports based on selected filters. Sort and filter your data by date, assigned user, and more. Visual charts help illustrate discrepancies in totals, as well as view detailed breakdowns by denomination.

A large touch screen with an easy to use menu, numeric keyboard and other preset options & functions help ensure a fast operation. The rejection pocket is designed for non-stop operation during high-volume use. These features allow for a smooth, continuous counting operation.

The 58mm built-in thermal printer allows you to print a receipt with the count details. This embedded feature makes this unit a space-saving, light and ergonomic solution for your busy tellers, business owners, managers etc.
