## Humidity/temperature measuring instrument

testo 625 - Digital thermohygrometer with App connection

Simple, fast and precise measurement of air temperature and relative humidity

Calculation of dewpoint and wet bulb temperature

Fast in-app configuration, graph history, second screen and measurement data memory in the testo Smart App

Audible alarm sounds if a limit value is exceeded

Timed and point mean value calculation

Relative humidity and air temperature are two decisive factors e.g. for the assessment of **indoor air quality and comfort**. So if you want to ensure that people are comfortable indoors or that optimum conditions prevail in **storage rooms**, the compact testo 625 thermohygrometer is the ideal choice.

To obtain precise results as quickly and easily as possible, the testo 625 not only calculates dewpoint and wet bulb temperature automatically. The time and the point averages are also displayed immediately. And with the testo Smart App, you get the most out of the thermohygrometer:

- Configure measuring instrument
- Display graphical measured value curve
- Save measurement data
- Manage customers and measuring points
- Documentation on site
- E-mail dispatch of the report

#### The testo Smart App

• Simple and fast: Measurement menus for numerous applications provide optimum support in configuring and carrying out the measurement

• Clear graphical presentation of readings, e.g. as a table, for quick interpretation of results

• Create digital measurement reports including photos as PDF/CSV files on site and send via e-mail

Free download for Android and iOS
