

#### SHOWER RAMP INSTALLATION GUIDE

#### Installation Tools and Materials Required

- Empervious Shower System joint sealant\*
- Empervious Sausage Gun or Caulk gun for joint sealant
- · Corner putty knives and standard putty knives
- Cleaning Wipes
- Utility Knife, Tape Measure, and V-notch Trowel

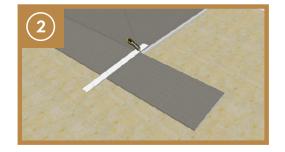

### Step 1

Measure the length of the area where you are going to install the shower ramp. [fig. 1]

#### Step 2

Dry fit the ramp and mark it where it needs to be cut to fit the width of the shower pan. Using a straight edge and utility knife, cut the shower ramp to the proper size. [fig. 2]

# Step 3

Apply a 1/2" solid bead of joint sealant to the notch of the shower pan. [fig. 3]

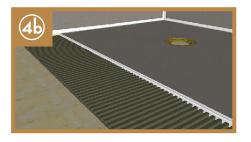

<sup>\*</sup>Recommended sealant is SikaFlex 11FC.
Failure to use recommended sealant will negate warranty

## Step 4

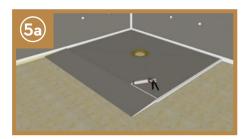

Apply modified thinset to the subfloor using a v-notch trowel. [fig. 4a] [fig. 4b]

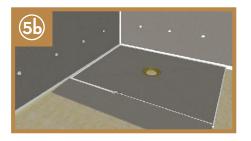

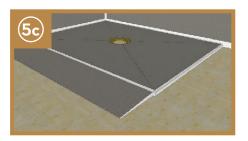

### Step 5

Install the shower ramp to the floor, firmly pressing the ramp into the thinset. Apply a 1/2" solid bead of joint sealant [fig. 5a] to seal the gap between the top of the ramp and the shower pan and smooth using the putty knife. [fig. 5b] [fig. 5c]

<sup>\*</sup>Recommended sealant is SikaFlex 11FC. Failure to use recommended sealant will negate warranty
