## Emser Tile's Tubage™ Wins 2023 Kitchen & Bath Business Product Award

**LOS ANGELES** (October 12, 2022) – Emser Tile®, leading designer and producer of the world's finest tile and natural stone, has been honored with a <u>2023 Kitchen & Bath Business (KBB) Product Award</u>. Emser's Tubage™ collection was named winner in the Wall Coverings category.

Tubage in Bronze

The annual KBB Product Awards honor manufacturers for superior products that fulfill the following criteria: meeting market need, technological advancement, aesthetic merit and innovation. Winners are chosen by an independent panel of judges, who together select one winner for each category.

"Our product development team pours their passion and commitment into every Emser product, and it's truly gratifying to witness their dedication being acknowledged by fellow professionals in the industry," said Suzanne Zurfluh, Director of Design and Trend at Emser Tile.

Tubage is an extruded porcelain which is a specialized production process that creates a high-quality three-dimensional tile. This provides a more natural look with slight variations between tiles offering the beauty of artisanal imperfection. Tubage can be used on indoor and outdoor wall applications, in both commercial and residential settings including kitchen backsplashes, bar fronts, shower walls, and fireplace facades. Available in a 7"x16" size with a glossy finish, Tubage<sup>TM</sup> offers a striking color palette of six hues all grounded in the beauty of nature. High-res images are available here.

## About Emser Tile LLC

Emser Tile is the largest privately held designer and marketer of tile and natural stone products in the United States. Our principle offering includes an extensive line of ceramic, porcelain, natural stone and decorative products to service the design and product needs of our customers. Our products are distributed nationally through a company-owned network of local sales and service locations. The company's products are used extensively in new home construction, remodel applications as well as commercial projects including multi-family housing, hospitality, shopping centers, office buildings and educational facilities.
