Emser Tile Opens Expanded Salt Lake City Branch

Company relocates to larger facility to service the growing Salt Lake City region

LOS ANGELES – Emser Tile, the leading designer, marketer and producer of the world’s finest tile and natural stone, has opened a new branch location in Salt Lake City – relocating and expanding from 8,800 to 22,000 square feet to provide even better customer access and service. Emser continues to grow their presence throughout North America, expanding their footprint along the West and East Coast, as well as the Midwest.

The relocation comes on the heels of high demand in the Salt Lake City construction market and will further Emser’s continued industry leadership by supporting accounts with new stocking programs and additional installation materials.

“We are thrilled that the growth in the Salt Lake City area has allowed for Emser to expand with new tools for our customers and partners, including a state-of-the-art showroom and easier access,” said Barbara Haaksma, Emser Tile Vice President of Marketing. “As we continue to provide unparalleled service and an array of leading tile and natural stone products, we look forward to growing our customer base in Salt Lake City.”

Headquartered in Los Angeles, next year marks the company’s 50th anniversary. In the past year, Emser Tile has opened locations in Tampa, Pompano and Miami, Fla., Columbus, Ohio, Lyndhurst, N.J. and Detroit. Additionally, Emser has distribution centers in California, Texas, and one set to open in Virginia in Spring 2017, marking a total of 75 sales and service locations in North America.

Emser Tile’s relocated Salt Lake City branch is now open, located at 3140 South 300 West.

About Emser Tile LLC - Emser Tile is the largest privately held designer and marketer of tile and natural stone products in the United States. Our principal offering includes an extensive line of ceramic, porcelain, natural stone and decorative products to service the design and product needs of our customers. Our products are distributed nationally through a company-owned network of local sales and service locations. The company's products are used extensively in new home construction, remodel applications as well as commercial projects including multi-family housing, hospitality, shopping centers, office buildings and educational facilities.
