Professional Tweezers

The EndureLash® Pro Tweezer Collection has been hand tested and approved by our Head EndureLash® Academy Trainer, Nikki Jacobson. The collection includes:

The EndureLash® Classic

The classic tweezer is perfect for classic pickup and placement. With the slight curve at the foot, it can manipulate and secure the inner and outer eye corners with ease. And all while keeping your hand in a comfortable and ergonomically correct position while lashing.

The EndureLash® Isolator

This isolator tweezer is the best isolation tweezer on the market. With its long handle and 45-degree angle, it pretty much does the work for you. Having a curved tweezer for isolation helps you as the artist rest your hand comfortably on the client as a fulcrum point, allowing perfect isolation at the lash line and starting point.

The EndureLash® Ultimate Volume

This is our version of a universal volume tweezer. No matter your technique for creating volume fans, this tweezer will aid you in lash pickup flawlessly. The work zone is the entire foot of the tweezer, allowing you as the artist to pick up any type of lash fan. Wide fans, narrow fans, ANY FANS large or small...

The EndureLash® Precision Mega Volume

This J-Hook shaped tweezer works best for the seasoned artist who's creating Large Mega Volume Fans. Because of the large work zone and extra foot space in the design of this tweezer, the artist can create sizable mega volume fans with ease! BIG BONUS, this tweezer can also be used for isolation!

The EndureLash® The Ultimate Volume 2 (UV2)

Specially designed for the artist who prefer extra workspace while enjoying all the benefits and features of the Ultimate Volume Tweezer. A slightly longer handle and foot length and works beautifully with both Mega Volume and Volume Lash pickup and fan techniques.
