OUTFAB DOS AND DON'TS

Below is a common issues we see with submissions.

#1

DO - use RGB

Click on the components.
You can see they are 100% RGB black R0, G0, B0
and the blue lines are also RGB R0G0B255
The RGB values must be exactly the values shown on the guidelines.
B254 will not cut.

DON'T - use CMYK

Click on the components.
You can see they are varying shades of CMYK coded colors
This will not cut at all.
