1.800.888.8663
www.shippertmedical.com
OUR MISSION
To improve outcomes for the global healthcare community and the patients they serve through innovative solutions that elevate the delivery of care.

ELEVATING CARE. IMPROVING OUTCOMES.
Innovia Medical develops and manufactures a portfolio of product solutions designed with both the medical professional and their patients in mind, to deliver care that:

• Saves time for both the medical professional and patient
• Delivers a consistent and predictable care experience
• And improves patient confidence with reduced recovery times and less discomfort

Innovia Medical does this through a commitment to innovation through collaboration, unsurpassed product quality and a dedication to provide the highest quality, personalized customer service.

INNOVATION THROUGH COLLABORATION.
We regularly seek feedback and input from doctors, nurses and other medical professionals throughout the product research, testing and development stages, as well as frequently update and customize products based on our medical partners’ requests and suggestions. This collaborative approach has resulted in industry-leading innovations like the EarPopper® Ear Relief Device, Minnie Fishe® Agile MFM, InstruSafe® Products, the Denver Splint® and more.

EXCEPTIONAL, PERSONALIZED CUSTOMER SERVICE.
From our sales representatives to our customer service team, and every associate at Innovia Medical, the delivery of an unrivaled customer experience is everyone’s most important job. This begins by ensuring that each customer receives the right product to meet his or her specific needs through our dedication to providing assistance through technical support, as well as through live customer service representatives who have extensive product knowledge. From order and shipping confirmations, delivery date communications and more, our team is here to provide quick and thorough responses every time.

At Innovia Medical, we know you’re committed to providing the very best care possible. Our goal is to be your trusted partner to help you every step of the way.

**Physician's Top Choice for Viable Fat Grafting**

The Tissu-Trans® units do not change the normal flow of the physician’s technique. Standard tumescent solution is infused. The Tissu-Trans' unit is placed inline between the harvest cannula and the waste canister/suction source. Suction pressure is reduced to 15” Hg and fat is drawn into the mesh filter within the canister. Waste (blood, epinephrine, Xylocaine) and non-viable cells are pulled through the filter and are suctioned out to the waste canister. When the desired volume is collected, the transfer tube is attached and the FILTRON® unit is inverted. The quality fat is then drawn directly into a luer lock syringe and is ready to re-inject.

**Gently separates and concentrates viable fat cells**
**Filters and removes waste, non-viable cells and excess fluid during harvest**
**Fat is immediately ready for re-injection**
**No centrifuge or decant time required- HUGE time savings**
**Closed, sterile collection**
**Compatible with all aspirators and instruments**
**Disposable; no sterile processing required**
**Five volumes; 100cc, 250cc, 500cc, 1000cc, 2000cc**

**AN INNOVIA MEDICAL COMPANY**

- Gently separates and concentrates viable fat cells
- Filters and removes waste, non-viable cells and excess fluid during harvest
- Fat is immediately ready for re-injection
- No centrifuge or decant time required—HUGE time savings
- Closed, sterile collection
- Compatible with all aspirators and instruments
- Disposable; no sterile processing required
- Five volumes: 100cc, 250cc, 500cc, 1000cc, 2000cc

Unit volume is total quality fat that is ready for reinjection. Waste fraction is already removed.

Most Popular Size

Unit volume is total quality fat that is ready for reinjection. Waste fraction is already removed.
**Fat Grafting Cannula Kits**

**Fat Grafting Cannula Kit  ** Starter

**3-CK-FGSt** 8 piece complete cannula kit for those starting fat grafting. Large and small volume.
Includes our most popular infiltration, harvest and reinjection cannulas. Autoclavable.
- BAN 16 gauge x 15cm infiltration LL cannula
- BAN 14 gauge x 30cm infiltration LL cannula
- 24H 3mm x 30cm Harvest cannula on Biplane handle
- 4H 3mm x 30cm Harvest cannula on Biplane handle
- H2 14 gauge x 8cm Reinjection LL cannula (body)
- H2 16 gauge x 8cm Reinjection LL cannula (face)
- H2 18gauge x 8cm Reinjection LL cannula (lips, eyelids)

**Fat Grafting Cannula Kit  ** Small Volume

**3-CK-FGSV** 4 piece complete kit with infiltration, harvest, and reinjection cannulas.
Includes our most common cannulas for small volume fat grafting: face, hands, corrections. Autoclavable.
- BAN 16 gauge x 15cm infiltration LL cannula
- 24H 3mm x 15cm Harvest LL cannula
- H2 16 gauge x 8cm Reinjection LL cannula (face)
- H2 18gauge x 8cm Reinjection LL cannula (lips, eyelids)

**Fat Grafting Cannula Kit  ** Large Volume

**3-CK-FGVLV** 3 piece complete kit with infiltration, harvest, and reinjection cannulas.
Includes our most common cannulas for large volume fat grafting: buttocks, breast, and body contouring. Autoclavable.
- BAN 14 gauge x 30cm infiltration LL cannula
- 4H 3mm x 30cm Harvest cannula on Biplane handle
- H2 3mm x 15cm Reinjection LL cannula

**Fat Grafting Cannula Kit  ** Breast

**3-CK-FGB** 4 piece kit for fat grafting to the breast.
Includes our most common infiltration, harvest, and reinjection cannulas. Autoclavable.
- BAN 14 gauge x 30cm infiltration LL cannula
- 4H 3mm x 30cm Harvest cannula on Biplane handle
- H2 3mm x 15cm Reinjection LL cannula
- H2 14 gauge x 8cm Reinjection LL cannula

**Tissu-Trans® Stand Options**

**Tissu-Trans® Stand**
- Operating room canister stand with four universal brackets
- Compatible with all Tissu-Trans® devices
- Devices can be hung upright for harvest and upside down for fat removal
- Five legs for stability
- To maintain sterility, a sterile drape or mayo stand cover is placed over the top of the stand prior to hanging a Tissu-Trans device

**3-T-STAND-DLX** 34” height. Standard height
**3-T-STAND-TALL** 52” height. Extended height to raise sterile field
Specially designed for use with the Tissu-Trans®

**Tissu-Trans® Stand Add-on Bracket  ** -NEW-
- Optional bracket to attach Tissu-Trans® units to sterile drape and OR stand
- Universal bracket fitting is compatible with all Tissu-Trans units
- Allows one more sterile barrier between stand, drape and fat collection unit
- Devices can be hung upright for harvest or upside down for fat removal
- Reusable

Place sterile drape over OR floor stand. Attach sterile add-on Bracket. Hang sterile Tissu-Trans® unit on bracket

**3-TT-BRACK-SMT** Add-on bracket to attach Tissu-Trans® units to sterile drape and stand.

**Tissu-Trans® IV Pole Bracket  ** -NEW-
- Universal bracket with clamp to fit any IV pole
- Compatible with all Tissu-Trans® devices
- Devices can be hung upright or upside down
- Reusable

**3-TT-BRACK-HK** Tissu-Trans’ Bracket with clamp for IV Pole
**VacLock Syringes for Manual Harvest**

- For manual fat harvest without outside suction source
- Luer Lock tip
- Built-in locking mechanism to maintain negative pressure
- Polycarbonate barrel for clear visibility
- ABS/PC/Silicone
- Three-year shelf life
- Sterile
- Disposable

- **NEW SIZES**
  - 3-S-V10 10cc VacLok Syringe 25/box
  - 3-S-V20 20cc VacLok Syringe 20/box
  - 3-S-V30 30cc VacLok Syringe 20/box
  - 3-S-V60 60cc VacLok Syringe 25/box

Allow clinicians to lock the plunger in multiple positions for a negative pressure vacuum. This feature minimizes hand fatigue while increasing procedural efficiencies.

**Luer to Luer Transfer Disposable**

- Female Luer Lock to Luer Lock transfer system
- Polypropylene
- Sterile
- Disposable
- To transfer tissue or emulsify between syringes
- Large finger grips protect against contamination

- 3-S-13901 50/box

**Luer to Luer Transfer Reusable**

- Female Luer Lock to Luer Lock transfer system
- To transfer tissue or emulsify between syringes
- Stainless Steel

- 3-T-TLL3 3mm
- 3-T-TLL4 4mm

**Luer to Luer Transfer Decant Stand**

Acts as a syringe stand that allows for natural gravity decant of fat. Then gently and cleanly transfer fat into syringes via the luer lock connection. Autoclavable.

- TU-ATLDDS

**Biplane Lipo Fat Roller**

3-T-ROLLER  To contour and smooth skin during and after liposuction and fat graft procedures. Ergonomic handle. Reusable. Roller width 3.5” Roller diameter 2”

**BD Luer Lock Syringes**

- BD Syringes
- Luer Lock
- Sterile
- 20/box

- 3-S-LL10-20 10cc
- 3-S-LL20-20 20cc
- 3-S-LL30-20 30cc
- 3-S-LL50-20 50cc
- 3-S-LL60-20 60cc

**Monoject Syringes**

- 3-S-TI0-20 Slip Tip 10cc Oral Non-Sterile 20/box
- 3-S-TT3-20 Irrigation Tip 35cc Catheter Sterile 20/box
- 3-S-T60-20 Toomey Tip 60cc Sterile 20/box
- 3-S-MLL60-20 Luer Lock Tip 60cc Sterile 20/box

**Syringe Rack**

- White plastic
- Stackable
- Easy to disassemble
- Available for 5, 10, 30 and 60cc syringes

**Monoject Syringes**

- 3-S-10 -30 -60 -20

**Tulip Z Syringe Stand**

The ideal syringe stand for keeping your decanted tissue organized and at the ready.

- TU-SSL Large for 20cc - 60cc syringes
- TU-SSS Small for 12cc and smaller syringes

**Luer Lock Syringe Tip Caps**

Red polypropylene luer lock cap for standard luer lock syringes

- Packaged individually
- Sterile
- Disposable

- 3-S-55001 100/box

**Horseshoe and Clicker Locks**

Locks are used to maintain negative pressure in syringes during manual tissue aspiration.

- Horseshoe Locks
- Clicker Locks

- 3-S-HL10 10cc
- 3-S-HL60 60cc
- 3-S-CL10 10cc
- 3-S-CL60 60cc
LIPOSUCTION CANNULAS

  - Stainless Steel Luer Lock fittings on both ends.
  - Autoclavable.

- **3-H-BALI** - Shippert Black Aluminum Infiltration Handle
  - On/Off Push Button and Stainless Steel Luer Lock fittings on both ends.
  - Autoclavable.

**Tumescent Infiltration Cannulas**

- **3-C-BAN** - 6 Hole Spiral
  - Most common: 3-C-BAN-14x30 body/large areas (14 gauge x 30cm)
  - 3-C-BAN-16x15 face/small areas (16 gauge x 15cm)

- **3-C-MH** - 6 Hole Spray

**HK Monty Infiltration Cannulas**

- **HK-IC14M** - All 5 cannulas in set are 14gauge x 20cm
- **HK-IC16M** - All 5 cannulas in set are 16gauge x 15cm
- **HK-IC18M** - All 5 cannulas in set are 18gauge x 15cm

**Infiltration K Pump**

- Quiet, efficient, vibration free peristaltic infiltration pump. The control knob allows setting from 0 to 1000ml per minute flow rate.
- Infiltration tubing (3-TB-A3 or 3-TB-A3Y) can be easily mounted with the push of a lever that lets you insert silicone tubing section quickly and accurately, and locking in place.
- Dual pneumatic foot-pedal capability, a three roller peristaltic head; a safety lever and additional power connector for a TMD (Tumescent Measuring Device).
- The pump is available in either latching or non-latching operation.
- Latching is press foot-pedal and remove turns on, press foot-pedal and remove turns off. Non-latching is press foot-pedal turns on, remove foot from foot-pedal turns off.
- Weight: 9 lbs.
- Dimensions: 13 x 10 x 9 inches

**Klein Infiltration tubing with Pump Segment**

- **SMALL BORE** - Latex Free, Sterile, Disposable.
  - 1 spike and 1 luer connector.
  - **3-TB-A3**
    - ID: 1/9” (110°)
    - OD: 4/25” (160°)
    - 15.5 feet 10/box
  - **3-TB-A320**
    - ID: 1/9” (110°)
    - OD: 4/25” (160°)
    - 15.5 feet 20/box
  - 2 spikes and 1 luer connector. Double Spike Infiltration Tubing saves time and effort by hanging two bags of solution at one time.
  - **3-TB-A3Y**
    - ID: 1/9” (110°)
    - OD: 4/25” (160°)
    - 15.5 feet 20/box

**Infiltration tubing with Pump Segment**

- **LARGE BORE** - Latex Free, Sterile, Disposable.
  - 1 spike and 1 luer connector.
  - **3-TB-A2**
    - ID: 1/4” (.25")
    - OD: 3/8” (.375")
    - 15 feet 10/box

**High Pressure Suction Tubing - Liposuction**

- For use between Liposuction Cannula and Waste Canister
  - Thick walls to withstand high pressure suction • PVC
  - Latex Free • Sterile • Disposable
  - Length and bore diameter options to fit different cannister brands and liposuction handles

**Low Pressure Suction Tubing - Fat Grafting**

- For use between Fat Collection Unit and Waste Canister
  - Vacuum pressure is reduced when harvesting fat for re-injection, therefore, thick tubing is not necessary
  - For use with Low Pressure Suction 1/2 atmosphere, 10-15” Hg, or 50% power
  - Thinner walls than standard liposuction tubing • PVC
  - Latex Free • Sterile • Disposable

**Klein Infiltration tubing with Pump Segment**

- **SMALL BORE** - Latex Free, Sterile, Disposable.
  - 1 spike and 1 luer connector.
  - **3-TB-A3**
    - ID: 1/9” (110°)
    - OD: 4/25” (160°)
    - 15.5 feet 10/box
  - **3-TB-A320**
    - ID: 1/9” (110°)
    - OD: 4/25” (160°)
    - 15.5 feet 20/box
  - 2 spikes and 1 luer connector. Double Spike Infiltration Tubing saves time and effort by hanging two bags of solution at one time.
  - **3-TB-A3Y**
    - ID: 1/9” (110°)
    - OD: 4/25” (160°)
    - 15.5 feet 20/box

**Infiltration tubing with Pump Segment**

- **LARGE BORE** - Latex Free, Sterile, Disposable.
  - 1 spike and 1 luer connector.
  - **3-TB-A2**
    - ID: 1/4” (.25")
    - OD: 3/8” (.375")
    - 15 feet 10/box

**High Pressure Suction Tubing - Liposuction**

- For use between Liposuction Cannula and Waste Canister
  - Thick walls to withstand high pressure suction • PVC
  - Latex Free • Sterile • Disposable
  - Length and bore diameter options to fit different cannister brands and liposuction handles

**Low Pressure Suction Tubing - Fat Grafting**

- For use between Fat Collection Unit and Waste Canister
  - Vacuum pressure is reduced when harvesting fat for re-injection, therefore, thick tubing is not necessary
  - For use with Low Pressure Suction 1/2 atmosphere, 10-15” Hg, or 50% power
  - Thinner walls than standard liposuction tubing • PVC
  - Latex Free • Sterile • Disposable
Liposuction cannulas and handles must be sterilized before each use. Standard cleaning instructions:
1. Immerse in hot, soapy water
2. Scrub internally with a cannula brush and stylet
3. Ultrasound and/or pressure water if available
4. Dry and package
5. Autoclave at 132°C (270°F). Exposure time 4 minutes (minimum)

Cannula Cleaning and Sterilization

Cannula Cleaning Brushes
Stainless steel rod with medical grade nylon bristles.
Non-sterile.
CM-2001 18 gauge x 45.7 cm 2/box
CM-2002 14 gauge x 45.7 cm 2/box
CM-2004 2.2 mm x 45.7 cm 2/box
CM-2005 2.7 mm x 45.7 cm 2/box
3-C-BR3 3 mm x 48.0 cm each
3-C-BR4 4 mm x 48.0 cm each
3-C-BR5 5 mm x 48.0 cm each

Guardian Instrument Protection Trays
Anodized aluminum tray with finger mats
Accommodate a wide variety of small instrumentation
Vented silicone Finger Mats built in
Reduce instrument repair and replacement costs
Allow maximum sterilant flow
Prevent moisture accumulation
IN-1306 6” L x 6” W x 1” H
(152.4 mm L x 152.4 mm W x 25.4 mm H)
IN-1310 6” L x 10” W x 1” H
(152.4 mm L x 152.4 mm W x 25.4 mm H)

Liposuction Cannula Safety
When fat grafting, precise care must be taken with instrument cleaning. The Bioplane Handle cannula runs the entire length of the handle to ensure complete and easy cleaning. Other common liposuction handles have irregular internal channels and pockets making them difficult to clean properly. Tissue and bacteria may accumulate in these dead spaces, increasing the risk for contamination. “Are Your Liposuction Cannulas and Handle-Cannulas a Potential Problem if Used for Autologous Fat Graft/Transfer?” AJCS 6/2011

Cannula runs entire handle length.
One smooth channel.
Clean lumen cannula. Safe for fat grafting.
**VERONIQUE® COMPRESSION GARMENTS**

- Reinforced back stays
- White
- Adjustable front hook & eye closure
- Strong, durable stretch

**6” Single Panel Binder**
- Adjustable front hook & loop closures
- Nylon/Spanex
- White
- One Size

**9” Double Panel Binder**
- Two overlapping 6” wide panels form 9” wide binder
- Adjustable front hook & loop closures
- Reinforced back stays
- Strong, durable stretch
- White
- XS-4XL

**IZI ColdCare™ Pack**
- 3” diameter coldpack with gauze
- 25/box

ColdCare™ Packs are convenient, low-profile gel packs that provide effective cold therapy for up to 3 times longer than medical ice or chemical packs. Fits discreetly beneath clothing to deliver soothing pain relief. Effective post breast procedure treatment. Washable.

VERONIQUE® COMPRESSION GARMENTS

SeromaCath® Wound Drainage Kits
Sterile wound drainage systems for post-operative seromas following mastectomy, axillary dissection, groin dissection, latissimus dorsi flap, TRAM flap, liposuction, abdominoplasty, breast implants, and other procedures.

GR-1275 2.75” Blunt for Seromas surrounding Breast Implants
5 kits/box
• 2” (5 cm) 14G Teflon® catheter/stylet needle/plug with two side holes
• 2.75” (7cm) 17G blunt metal catheter with two side holes
• Connecting drainage tube for a bulb suction reservoir
• Bulb not included. GR-2001 must be purchased separately

GR-1035 3.5” for Deep Seromas common with abdominoplasty
5 kits/box
• 3.5” (8.9cm) 14G Teflon® catheter/stylet needle/plug with six side holes
• Connecting drainage tube for a bulb suction reservoir
• Bulb not included. GR-2001 must be purchased separately

GR-1002 2” for Common Seromas
5 kits/box
• 2” (5 cm) 14G Teflon® catheter/stylet needle/plug with six side holes
• Connecting drainage tube for a bulb suction reservoir
• Bulb not included. GR-2001 must be purchased separately

SeromaCath® Wound Drainage Bulb
GR-2001 100m1 Sapphire Bulb suction reservoir with anti-reflux valve
Bulb only. Each. 1/box.
• High silicone content gives it the highest suction of any commercially available 100cc silicone reservoir.
• Offers 55% more suction than the popular “JP Bulb”
• For use in general, orthopedic, urologic and neurosurgery
• Markers at 25, 50, 75 and 100cc for fast and easy fluid measurement
• Anti-reflux valve helps prevent backflow
• TA strap with stainless steel clip makes attaching the Sapphire to a gown or clothing convenient and discrete

Necessary for use with above kits. Must purchase separately.

AbsorbENT™ Nasal Packs

Nasal and sinus packs utilize three-dimensional interconnected open cells that are soft and pliable for epistaxis management.

- Sterile Polyvinyl Alcohol (PVA) foam. Single use.
- String attached for retention and removal.
- Soft, lint and fiber free.
- Gentle, but firm compression to nasal mucosa.
- Rapid wicking properties. Even and fast expansion.

Note: Dimensions listed are for hydrated state.

**Rhino Rocket® Nasal Pack with Applicator**

- Sterile PVA Expandacel® foam.
- Epistaxis management after trauma, nasal or sinus surgery.
- Gentle, but firm mucosal compression.
- Tamponade of anterior or middle segment epistaxis.
- Approximately 30 Seconds to position and insert.
- When in contact with moisture, foam swells to six times its compressed diameter.
- String attached for retention and easy removal.
- Dimensions listed are for hydrated state.

Patented Applicator:
- Minimizes blood containment concerns.
- Protects foam from moisture.
- Aids in insertion.
