

UNDER CONSTRUCTION

Ok we've implemented a new system, since UPS/USPS keeps breaking liquids, and making more money than we're shipping liquids around the USA. We'll be doing a youtube video soon, and updating the site soon!!

The new system **STARTER KITS** and **Refill Kits!**

What's provided in the 5 Gallon "STARTER KIT":

1. 1 natural color, square, tight head reusable container for each product "**for every 5 gallons of product you purchase**". We will also MARK the container at the 5 gallon mark with a sharpie
2. 2" cap for the containers **1 per container**
3. Shutoff/spout that comes with 3/4" male threads, that you can thread into the 2" cap **1 per container**
4. 1 funnel **PER ORDER** "you just rinse it off, and reuse for all containers". Is a QUALITY funnel with LARGE 2" spout. Makes it supper easy to pour powder/liquids into the containers
5. All the ingredients needed to make 5 gallons of each product you purchase. These will come in the container and sealed with a tamper proof lid.

All you'll have to do to make these "ready to use" liquid concentrates:

1. Unscrew the cap. "Canna makes/sells a \$5-\$10 wrench that works perfect for taking the lid ON & OFF"
2. Buy R.o. machine or use Distilled water. "Our local grocery store sells cheap distilled water for \$.80 per gallon" **YOUR CHOICE.**
3. Boil the water. " **Hot water** dissolves the salts almost on contact" but "**cold water** makes it a FUCKING NIGHTMARE" to mix the ingredients.

Some live in hot areas, so if you can utilize the sun's heat by heating this water to over 100°F you'll be better off than a guy who is using cold city water through a reverse osmosis machine.

We understand that heating up a bunch of water is probably the toughest part, but the alternative is A LOT OF SHAKING, and with the grow/bloom B's in particular you can get non-dissolved salts if the water is too cold.

4. Fill container up with about 2/3 Hot water, and shake VERY WELL!!! **Until ALL the powders are dissolved.**
5. Now to finish:

Top up the container until you reach the 5 Gallon mark "**we provided**", place the lid back on and shake.

TIP: This water doesn't have to be as hot, as long as the powders are fully dissolved of course...

6. The main 2" lid needs to be drilled with a drill bit, unibit etc. We can't do it for you, because the containers would not be sealed. Good news is once it's done, the starter kit's ready for a long life of service.

The rear small venting port needs to be drilled as well, so that the bottle doesn't burp as you pour from it, and can also cause a slower pour when using a spigot if not drilled too...

What's provided in the 5 Gallon "Refill KIT":

1. All the ingredients needed to make 5 gallons of each product you purchase.
2. These will come in the Sealable ziplock bag.

Again these premixed powders are the same **TYPE USED, and WEIGH the same** as the ones used in our "Ready 2 go" liquid Concentrates... All you're missing is us - "adding the water"!!

TIP: DON'T USE POWDER TO FEED YOUR PLANTS. Please add them to your containers and mix them with water first. GUARANTTING equal parts every time you feed... Yes these are mixed, but not thoroughly enough to scoop directly out of the bag, and add to your reservoirs. The goal is to have even parts of elements, food, chemicals, etc... every time you use a product.

****Powders are just too hard IMHO to be evenly premixed properly to insure an exact amount of NPK etc., every time you feed with a product, **especially the Micro Elements** since they're used in such small amounts. *****

THE BIG SAVINGS!!!

The refill Kits are really where you can optimize your savings with us, because most likely you already bought our "Starter Kits", so you have all the containers.

Now all you have to do is order 5 gallon **refill packages** and save **30-40% more**.

Example:

1. 5 gallon Grow A **Starter Kit** = \$100 "Free Shipped"= **\$20** a Gallon
2. 5 gallon Grow A **Refill Kit** = \$60-\$70 "Free Shipped"= **\$12 - \$14** a Gallon "Depend if you buy in bulk"

FYI: A refill Kit comes with the premixed powders in a sealed bag, so all you have to do is:

1. rinse/clean your Starter container
2. Add the Refill powder with the funnel we already provided
3. Add HOT water & Shake

Below are the prices for the 5 gallon "starter kits" and "refill kits".

STARTER KITS:

- 5 Gallon Bloom Part B **\$100**
- 5 Gallon Bloom Part A **\$100**
- 5 Gallon Grow Part B **\$100**
- 5 Gallon Grow Part A **\$100**
- 5 Gallon Early PK Booster **\$125**
- 5 Gallon LATE PK Booster **\$125**
- 5 Gallon Cal **\$90**
- 5 Gallon Mag **\$90**

Refill KITS:

1-2 Bag = 30% Discount

3-4 Bag PER PRODUCT = 40% Discount

5+ Bag PER PRODUCT = 50% Discount

- 5 Gallon Bloom Part B **\$70, \$60, \$50**
- 5 Gallon Bloom Part A **\$70, \$60, \$50**
- 5 Gallon Grow Part B **\$70, \$60, \$50**
- 5 Gallon Grow Part A **\$70, \$60, \$50**
- 5 Gallon Early PK Booster **\$88, \$75, \$62**
- 5 Gallon LATE PK Booster **\$88, \$75, \$62**
- 5 Gallon Cal **\$63, \$54, \$45**
- 5 Gallon Mag **\$63, \$54, \$45**

TIP: These "Refill Kits" come sealed, so they don't expire, so don't be afraid to buy in bulk. Just keep them sealed and in a dry, dark, and cool area.

Products that come ready to use from us:

- Hormone-Vitamin Booster **\$200** 4 Gallon "Comes in a 1 Gallon bottle x4 Strong"
- Plant Flusher **\$25** 1 Gallon "Comes in a 1 LITER bottle x4 Strong"
- Amino Acid Booster Hydrolyzed Whey Protein **\$15** 1 Pound
- Carbo Booster **\$15** 1 Pound "makes 4 Gallons of Carboloader®"
- Silica Booster **\$13** 1 Pound "makes 4 Gallons of Silica Blast®"
- H2O2 35% Food Grade "Hydrogen Peroxide" 5 Gallons **\$100 FREE SHIPPED**, Comes with 5 Gallon SQUARE TIGHT Container, Lids, and Spigot/Shutoff Valve
- Bushy – Bushmaster KNOCK OFF – Pgr – USED early flower to stop stretch, and kick start pre-flowers 1 Gallon **\$50 FREE SHIPPED** "Comes in a 1 LITER bottle x4 Strong"
- Hard Knox – Gravity KNOCK OFF – Pgr – USED Late flower to HARDEN THE BUDS 1 Gallon **\$50 FREE SHIPPED** "Comes in a 1 LITER bottle x4 Strong"
- Clone Dip – Compares to: Dip n Grow® 1 LITER bottle" **\$20 FREE SHIPPED**
- Clone Feed Solution - Compares to: Clonex Clone Solution® 1 Gallon "Comes in a 1 LITER bottle x 4 Strong" **\$20 FREE SHIPPED**
