Inside My Room: 41 Winks Bedding

As some of my readers may know, I have recently gone through a lot of life changes. I just moved into my first apartment, changed cities (moving away from my hometown where I've grown up), and changed universities. Although change can be scary or stressful, all these changes are for the better, and I'm loving it. One of my favorite parts? Decorating my first apartment! Now that I'm starting a new chapter, I wanted to create a new ambiance to go along with the new life. As fate would have it, 41 Winks, a New York City-based designer of beautiful, fashion bedding décor, contacted me to select a bedding set. An essential part of every apartment is the bedroom. I left my colorful bedspread at home in my old room and decided to go with a more sophisticated, neutral spread for my apartment. But not neutral as in boring. This duvet cover has metallic gold linen, floral embroidered panels, and striped seersucker. Just gorgeous! I recommend you check out the 41 Winks website for more selections. If you wish to be a brand ambassador on your college campus, see details I included below. Now, I'm off to another graphic design class; I'm already studying or creating projects every night. College life is such a blast, right?! Xoxo, Shelly
