

## KRX 1000 Rear Harness Bar Installation Guide

Fits 2023+ Kawasaki KRX 1000 4-Seater Models Only

### Included:

- Rear Harness Bar
- Mounting Hardware

### Tools Required:

- 5/16" Drill Bit
- Drill
- Socket/Wrench Set
- Safety Glasses
- Jack (Recommended)

### Installation Steps:

1. Locate the factory flanges behind the rear seats where the bar mounts.
2. Drill out dimples using a 5/16" drill bit.
3. TIP: Loosen cage bolts and use a jack under the center of the KRX to relieve stress. You may need to spread or compress the cage slightly depending on how it has settled.
4. Align the bar with drilled holes.
5. Install the hardware provided. Tighten securely, but do not overtighten.
6. Confirm the bar is solid and secure.
7. Mount your harnesses to the bar.
