

The invisible threat to heart health

Part 2

Even the experts can be affected by heart disease.

In part one of this series, Warren spoke about his journey from sailing a boat to Asia to lying flat on his back in ICU from a serious blind spot - he was unaware of a build-up of calcification in his cardiovascular system, in particular, his aortic valve.

In this second interview, Warren spills the secrets on how he fixed the problem and the formula that gave him a heart age of 40 when he was celebrating his 73rd birthday.

The Warren Matthews story - Part 2

Warren Matthews, founder of Xtend-Life, went from being incredibly healthy to lying flat on his back in the ICU.

Read on for the stories and the science that inspired the ingredients in CX8 and what he learned from working with the experts who developed them.

I've been getting calf pain (I'm 74), but today I went walking and the calf pain had backed WAY down! By the time I got back to my starting point I was grinning and feeling sooooo thankful for the reduction in pain! I'm thinking it's the CX8 clearing out my leg arteries!! I've been taking it for 9 weeks and intend to keep at it!
Thanks for all your effort developing CX8!

Bruce, USA

Great help!
 Thank you Warren for CX8 which I am going to take. After a heart attack out of the blue (no risk identified) at the aged of 55, I have been searching for natural solutions and been taking many supplements. Your products are a condensation of what I have been taking in many different forms.
 Great job!

Annie, France
