There's a good reason that thousands of our customers make taking the economy version of Total Balance Premium a daily habit.

For the last 20 years our specific blends for men and women have taken the guesswork out of building foundational health.

And we've just made it even better.

The 9th version includes new, scientifically-proven ingredients so you can be sure that Total Balance Standard is a habit you can continue to rely on.

Among the dozens of supplements I tried, Total Balance Men's is the only one I have never stopped taking on a daily basis. I was in my early 20s and in university when I started taking it and I still remember how drastically it improved my mood, my energy level, my ability to focus... To this day, I still take the full dose faithfully because I clearly see this product works.

After having 5 kids, my bones felt hollow, and I just didn't feel strong and robust. I have a tricky digestive track, so the enteric coating was attractive to me. The list of ingredients is what I was looking for. I stay on Total Balance Women's because I feel great, I look younger than a lot of people my age, and I just don't get sick anymore... I just feel happy, healthy, and robust.
