

## Port-a-guard Light Expandable Barrier

### Plastic portable expandable barrier

The Light Expanding Barriers are made of Black and Yellow hi-tech plastics and comes with a built-in handle and locking strap to simplify handling and portability. This pedestrian barrier can be used as a temporary solution to control pedestrian traffic. The plastic slats and legs are corrosion resistant and durable while still maintaining its 3kg lightweight construction. However, if extra stability is required – for example, in windy conditions – the legs can be filled with water to add weight.
