

THREE INSTALLATION OPTIONS: DESIGNED FOR PERFECTION

There are three unique mounting options for LilliPad Diving Boards. These mounting options ensure a solid and secure installation in addition to taking aesthetics, ease of installation, cost, and the ability to mount alternate accessories into the same mounting system into the equation. You will find a wealth of information online about the mounting kits but the best way to find out which kit is right for you is to give us a call. When you call Splashy McFun you will always speak to a live and knowledgeable person who will explain the best mounting kit for you...and your boat. In addition, we can provide an email or text with video links to the installation(s) we are recommending.

Our goal is to provide exceptional and personalized customer service.

Let us take the guesswork out of selecting the right diving board for you; **give us a call 7-Days a week at 888-897-7527.**

MOUNTING KITS

Confirm Your Mounting Location BEFORE Selecting Your Mounting Kit

Before selecting your mounting kit it is important to know where you plan to mount your diving board (stern, bow, side door, etc) and to confirm that the location meets our approved specifications for mounting. If you have not reviewed the specifications or are unsure where you want to mount your diving board visit our [Boat Specifications](#) page or give us a call at 888-897-7527 or email us at sales@splashymcfun.com

Ghost Mount

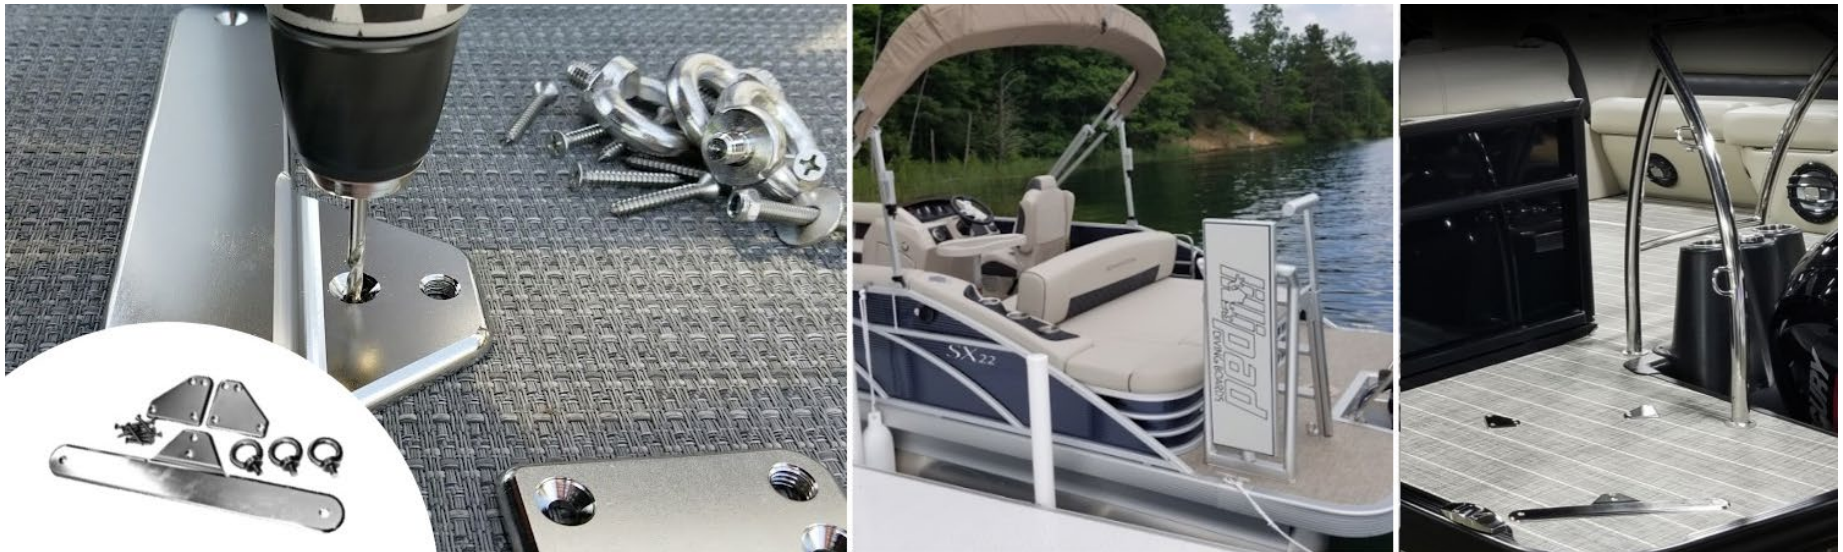

THE INVISIBLE MOUNTING SYSTEM
UNIVERSAL MOUNT FOR YOUR DIVING BOARD, GRILL, & FLAG

GHOST MOUNT

The International Award Winning LilliPad Ghost Mount System is the ultimate accessory mounting kit for your boat. The Ghost Mount works as a single mounting point for deck accessories such as flag poles, rod holders, and grill posts or in multipoint mounting configurations for cooler-tie-downs and LilliPad Diving Boards. With a face smaller than a quarter, the Ghost Mount installs flush to the deck, so it can be placed almost anywhere without creating an obstruction or toe-stubbing threat. The Ghost Mount kit for a LilliPad Diving Board is a three point mounting system and typically utilized in bow and stern mount applications.

With a three-point Ghost Mount system installed, you have the versatility to utilize the mounts for a diving board, grill post, flag-pole or as a cooler-tie down. (Optional accessories sold separately) Individual Ghost Mounts are also sold separately to allow optional mounting locations, like the flag pole shown above.

SURFACE MOUNT

The Surface Mounting kit is used on boats with a substantial amount of bracing in the mounting area. This mounting kit is designed to utilize the strength of the crossmembers to create a very solid and secure installation. The most popular use of the surface mount kit is on aft-deck installations on tri-toon pontoon boats with a horsepower rating above 150. Surface mounting kits can also be used for fiberglass applications.

UNDERFLOOR MOUNT

The Underfloor Mounting system is typically used on boats that allow access to the underside of the flooring surface and with proper spacing for the placement of the mounting plates without obstruction. Underfloor mount kits are often used for side-door installations and on two-tube pontoon boats with low horsepower ratings.
