

TREND REPORT

Earthy Tones, Must-Have Shackets & Flannels, and cool Leather Looks

FALL'S COMING...

Are you ready for it!?

It's only been a few weeks since market and I mean it when I say, FALL IS COMING! The stores received hundreds of new styles since then and we cannot wait to show you all the goodies. As you're shopping this season, keep an eye out for a few key trends that you will not want to miss...

Earthy tones are a major focus in fashion this year. Rust, copper, sienna, and of course neutrals will be mixed into the Katsch assortment. These warm tones bring a cozier vibe to fall and instantly elevate your look.

Expect shackets and flannels to be back too! These fan favorite layers are not going anywhere, but are updated with unique colors, fabrics, and silhouettes. Just wait to be blown away!

Lastly, leather looks are making their way into everyday fashion! We love this trend and being able to play around with new looks (don't worry all of our leather is vegan!!) These styles create that "cool girl" look and we cannot get enough!
