Right Foot

Print this scale in original size (please check print settings). Measure the foot length and width while standing-up straight and barefoot.

1. Place the heel at the upper end of the paper
2. Place the widest part of the outer side of the foot along the red line
3. Read the size from the scale
4. With pencil and ruler draw a straight line at the widest part of the inside of the foot. Where the line meets the colour fields – read the width.
