

How to TRAVEL LIGHT

without leaving YOUR STYLE BEHIND

Step ONE - CHECK THE WEATHER

This might sound obvious, but in all the excitement of upcoming vacation - it is very easy to forget such a simple thing as checking the actual forecast and just „hope for the best“.

TAKE "SPECIAL PIECES" - Step TWO

You need to feel 100% gorgeous every day of your long-awaited getaway, so take out all of those pieces that you were saving for a "special occasion". Now will be the time to shine!

Step THREE - THINK OUTFITS

Try to choose items with maximum possibilities for combinations and layering, but without looking like you are going on a polar expedition. So think "outfits", not just separates!

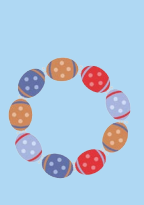

ROLL, NOT FOLD - Step FOUR

Rolled up clothes take less space in a suitcase than folded! Plus, you will avoid creases and use the maximum of your suitcase space by stuffing rolls into every corner. Don't forget to use the space inside your shoes and bags too!

Step FIVE - ACCESSORIES

Accessories are important, but you don't need to take too many. Choose 2-3 of most versatile ones and take the biggest bag as a carry-on on the plane - this will save you a lot of space in your suitcase!

MAKE-UP ESSENTIALS - Step SIX

Make-up, we can't live without it... But! You do not need all of your collection on your trip. Take as much as would fit into a travel roll-up toiletry bag that you can hang on a hook - extremely practical!
