SMARTPAN[®]

A Revolution in Plumbing Technology!

Recommended by
Henry Brooks
www.henrybrooks.co.nz

No offset fitting required for baths & showers

A new plumbing product - a large bowl shaped drain below floor level - allowing **flexible positioning** of toilets, baths and shower trays.

Approved with the 'Watermark' the **SMARTPAN[®]** is a 250mm diameter bowl shaped moulded plastic floor waste with a glue-on lid, made from ABS to AS/NZS.

The hole for the pan collar may be **drilled anywhere** in the plastic lid.

A **support stand** stabilises the **SMARTPAN[®]** and allows for vertical height adjustment, can assist in **termite protection** and can accommodate a **fire collar** for use in multi-storey construction.

No more adjusting toilet pan to suit riser pipe

UNDER BATH OR SHOWERBASE

Bath or shower base right down on floor

WaterMark

A/NZ STANDARD
MP52 SPEC 005

SMARTSEAL® BATHWASTE CONNECTOR

Approved to Australian Standards with the Watermark.

SMARTSEAL® (used in conjunction with SMARTPAN®). A breakthrough in installing Baths and shower bases **flat on the floor**.

The flexible PVC lid, 250mm in diameter, is held in place with a stainless steel pressure ring and **allows adjustable positioning**, horizontally and vertically.

The waterproof connection between either a bath or shower base and a Smartpan also **allows subsequent removal without requiring access to the connection**.

- **Easy to Install**
- **Eliminates the stepup to shower**
- **Flexible positioning**

And where need be use in conjunction with this Smart Trap

SMART Products >> SMARTRAP

The SMARTRAP is an amazing space-saving design reducing underfloor depth by up to 75%.

The SMARTRAP is self-cleaning and can be installed in the traditional way.

Iplex Product Code – D101STRAP1050

SMARTRAP under concrete floor - used with a SMARTCAP

Installation Instructions

Pre-fit all joints and mark position before assembling, using priming fluid and solvent cement.

Assemble first 50mm M & F bend vertically, and fully insert 100mm pipe to maintain 70mm waterseal minimum.

SMARTRAP may preferably be fitted under every fixture to eliminate 4-way risers. Multiple SMARTRAP's save space and reduce odours, surcharge, frothing and noise.

A SMARTCAP may be installed onto formwork to create a cavity on underside of concrete floor. This will allow the SMARTRAP bend to fit up into the floor, to further reduce the depth by 75mm (as shown in diagram above). Iplex product code for the SMARTCAP is D101SCAP.

Frequently Asked Questions

When installed, what is the overall height of the SMARTRAP?

176mm

This trap is a suggested product to be used as a floor waste under our freestanding Baths and Spa baths.

If, for your installation you decide to use a different floor waste product you do not effect the bath warranty, so long as the bath has not been modified in anyway.

Thank you for buying a Freestanding Bath or Spa bath From Henry Brooks ltd.
