

BioFiber® Disposable Dusting Sheets

DISPOSABLE DUSTING SHEETS

PRODUCT DATA SHEET

TYPICAL APPLICATIONS: DRY MOPPING

DESCRIPTION

BioFiber is disposable and economical, outperforming the leading sweeper brand while giving the added benefit of being biodegradable. BioFiber builds an electrostatic charge that draws and locks in dust particles, which improves indoor air quality in hospitals, office buildings, classrooms and stores. The specially formulated long fiber technology attracts 99% of bacteria without use of any chemicals, helping to protect against cross-contamination in healthcare environments. BioFiber sheets can be safely disposed into landfills or composted. Within 4-6 weeks they will break down into less than 1 oz. of inert material.

In accordance ASTM D6400-99 standard.

PRODUCT SPECS

O'Dell Item	Size	Length	Width	Cleaning Width	
BF248	8 x 24	24"	8"	24"	
BF100	100 sheet roll	24 - 48"	8"	24 - 48"

PACKAGING SPECS

O'Dell Item	Case Pack	Case Weight (lbs)	Case Dimensions	Case Cube
BF248	200	4.9	24 x 8.5 x 9.5	1.15
BF100	4	11	32 x 11.5 x 12	2.69

DIRECTIONS FOR USE

Squeeze spring clip to release from frame. Attach desired size BioFiber sheet, and fold over the edges of the frame. Squeeze the spring clip, and snap the sheet into place. Slide frame connector into handle. Dry dust the floor, with a leading edge motion. Once sheet is visibly soiled, discard, and attach another sheet.

AVAILABLE OPTIONS

Perforated for size of choice.
