

EchoFiber[®]

by O'Dell

ECHOFIBER ADVANTAGES:

- Superior strength
- Immediate absorption
- Eliminates wringer strain
- Microlevel cleaning by traditional methods
- Launders 100's of times

Echofiber mop that's been used and washed 300 times.

Echofiber loop mops are produced using the advanced technology of knitted microfiber tubes.

The traditional design allows users to perform microlevel cleaning through a familiar method, while also taking advantage of the superior strength, increased absorption, and effortless wringing of the microfibers. EchoFiber wet mops are lightweight, greatly reducing user fatigue, and will launder hundreds of times, ensuring that you get the maximum out of each dollar you spend. Not only do EchoFiber mops provide healthy improvements in application, they also leave surfaces much cleaner, improving appearance, indoor air quality, and the overall health of your facility.

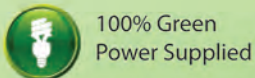

EchoFiber--the best of traditional meets your green cleaning goals of tomorrow.
