

## Need to make your floors safer?

According to the National Floor Safety Institute (NFSI) over 3 million restaurant employees and one million guests are injured annually by restaurant slips and falls. The industry spends \$2 Billion annually in compensation.\*

Always on the leading edge of product innovation, O'Dell offers a safer alternative to traditional mops for the foodservice industry: the **Sure Step** Mophead.

The new Sure Step mop yarn is composed of hydrophilic polyester and a low-melt fiber blended yarn combined with a grease-release agent baked into the fibers.

Typically, grease settles on conventional yarns even after being rinsed in the bucket and wrung out, spreading grease over the mopped floor. The Sure Step mop absorbs oils, and other liquids, and it has fantastic release of grease once it hits the water.

\*As stated by the National Floor Safety Institute website: <http://www.nfsi.org>

# Sure Step

KEEPING FLOORS SAFER

*Reduces potential slips and falls*

*Certified High-Traction by the National Floor Safety Institute*

*Absorbs oils*

*Minimal release of soiled liquids on surface*

*2 - 3x more absorbent than other mopheads*

*Color coded*

State of the art chemical technology, with an innovative blend of yarns:

The Sure Step mop is a hygienic, easy-to-use, effective way to ensure cleaner, safer floors for your customers and staff.

The Sure Step mop technology allows the mop to absorb twice as much grease and oil as the conventional cotton mop. This mop is designed to release soiled solutions more effectively than conventional mop heads.

In kitchens and commercial applications, grease build up is inevitable, but it poses a tremendous risk to employees and customers. This has cost the industry billions of dollars in losses.

**You need a mop that addresses this problem!**

**You need the Sure Step**

# Sure Step

KEEPING FLOORS SAFER

Comes standard with 5" wide headband. Also available with standard twist-on part, Sure Thread, or with a narrow band. Scrub pads may be added if more aggressive scrubbing is necessary.

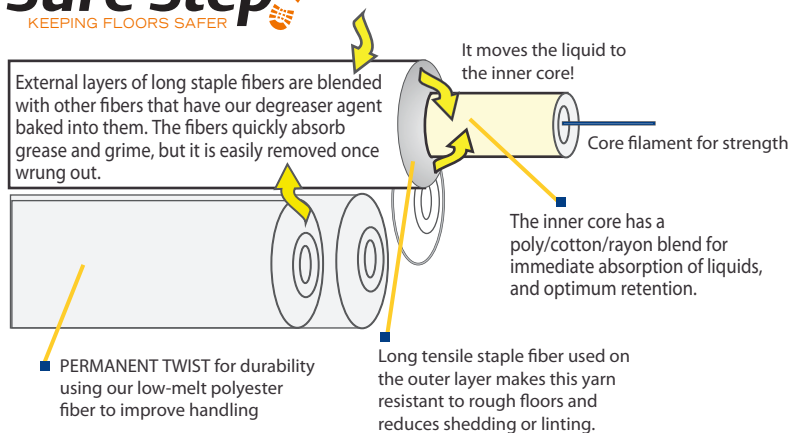

Available in Blue, Green, or White to color code areas, and prevent cross contamination

Looped ends have greater durability

Tailband provides wide coverage.
