224 ST							D, P	D, P	D, P	D, P	D, P	D	D
Over-barrel													
XTREME								P	P	P	D, P		
COMPACT						D	D	D	D	D	D	D	D
LEM 5-115	D	D	D	D	D, P	D, P	D, P						

How to navigate the above chart when choosing the appropriate product for your rifle.

When choosing an over-barrel model e.g. LEM 5-115 or the COMPACT ensure that you measure the exposed barrel length of your rifle. Measure from the front of the gas- block or the front of the hand-guard which ever is the closest to the muzzle, measurement is taken to the face of the muzzle.

Then go to our website and locate the appropriate product, to the right of the Product page you will see "**Product Info**" scroll down until you see "**Minimum Barrel Length Required**" compare this measurement to your rifle.

For rifles where the moderator is to finish inside the handguard, you will need to measure the internal diameter of the front of the handguard and cross reference this with the product diameter.

Please Note: Ensure the rear of the moderator does not contact the handguard or gas-block.
Specify thread size & thread length when ordering.
