

FARER

HOPEWELL II

MODEL

THREE HAND AUTOMATIC

COMPLICATION

SELLITA SW200-1

MOVEMENT

The watch designed to have a full, elegant dial colour. Following our distinctive British design philosophy of bold colours, interesting textures and unrivalled levels of attention to detail. Siting against the deep blue sunray, double step, vintage curved dial are the classically shaped syringe hands finished in British pillar box gloss red. Super Lumi-Nova finishing is applied to the in-fill of the hands and in a micro dot pattern around the dial marking each hour index. Creating a watch you can't help but keep looking at.

Designed to be the ultimate classic case for any wrist at a size of 39.5mm diameter, 10mm depth and 20mm lugs. Crafted out of brushed 316L high grade stainless steel with a highly polished back and exhibition glass to view the Swiss Made SELLITA SW200-1 automatic movement. The curved dial is covered by a boxed cased sapphire crystal domed glass that gives the watch a beautiful aesthetic, especially when viewing at an angle. Our signature solid bronze tapered crown completes the case details, embossed with the Farer A marque.
