

## **Instruction Manual**

Thank you for your purchase! This Livin' Well Owl Scarecrow is designed as an effective bird and pest repellent solution. The owl's realistic looks gives the appearance of an actively hunting predator, intimidating the pests to leave the area. Effective to use on mice, birds, and other pests. The Livin' Well Owl Scarecrow has a 5 foot motion detector; when birds or other pests pass in front of the unit the Owl will activate with flashing eyes and a frightening sound.

## **Directions for Use:**

The Livin' Well Owl Scarecrow comes ready to use right out of the box! With a few easy steps you will be scaring away those nuisance pests in no time.

- Turn unit on. The On/Off switch is located on bottom of the unit, there are three settings: On, Center, and Off. On will activate Flashing Eyes and Sounds, Center position will activate Flashing Eyes only.
- 2. Place the owl in a location within 5 feet of the known area of pests. For best results, the owl needs to be in a sunny location and facing the issue area.
- 3. Secure owl to a surface using the rotating anchors on the bottom of the unit, and screw it into a fence post, dock, stump or other solid surface.

## For best results:

- Charge the battery for one day before initial use.
- Owl needs to be exposed to direct sunlight for at least part of the day.
- Batteries can are replaceable with standard Ni-MH AA Rechargeable batteries.
- To prevent pests from becoming accustomed to the owl, it's a good idea to move the placement of the owl every few weeks.
- Place owl in a prominent location so the pests can see it.
- Only use when pest are an issue and remove the unit at all other times.
- For optimum evening use, place owl facing a light source.
