

Shakespeare

Assembly

1. First press Part 1 in to the end of the Long tube (A).
2. Now press Part 2 in to the other end of tube (A) taking care to press it in straight so as not to damage the end of the thread.
3. Now press Part 3 in to the end of the top tube (B), at this point if you want a grain match screw part 1 on to part 2 and line the grain, unscrew and press together
4. Now take part 5 and 6 and place the clip over part 5 making sure to line the slot up with the clip and press together
5. To finish give the parts a quick wipe over to remove any dust

Drill Sizes 10.5 mm And 12.5 mm Or Letter Z
And $\frac{31}{64}$
