QUALITY SANITISING SOLUTIONS
TO ELIMINATE 99.9% OF UNWANTED GERMS

Be Protected

THINK ELECTRICAL
SANITISING SOLUTIONS TO ELIMINATE 99.9% OF GERMS

Washing with soap and water is the first choice, but hand sanitizer is great for when you can't get to soap and water. It’s more effective at eliminating germs - it kills rather than just removing them. Simple, fast, and effective, hand sanitizer protects against 99.9% of germs. With no need for soap or water, it’s a great hygiene solution for all families needing on the go protection, whilst leaving your hands feeling refreshed and germ-free.

Product Description: 25 Liter Hand Sanitizer

Product Description: 25 Liter Hand Sanitizer
SANITISING SOLUTIONS TO AVOID SPREADING GERMS TO OTHERS

When shopping for hand sanitizer, make sure you choose a sanitizer that contains between 60-95% alcohol. Also, when you use hand sanitizer, make sure you do so the right way. Generally, apply the liquid to the palm of one hand. Then rub it all over both hands until the sanitizer dries. This is effective in killing germs.

Product Description: 50ml Hand Sanitiser
A foot-operable sanitizer dispenser would come handy in the fight against COVID-19. The purpose of this invention is to control the spread of coronavirus from an infected person to others while using the same sanitizer bottle. With this device, the sanitiser could be used without touching the bottle with hands. By pressing the pedal with a foot, the bottle would dispense the liquid.

PERSONAL PROTECTIVE ESSENTIALS

TO BLOCK THE TRANSFER OF INFECTIOUS DISEASES

THINK ELECTRICAL
PROTECTIVE FULL BODY GEAR TO BLOCK VIRUS TRANSFERS

Full body gear blocks airborne, surface pathogens. Synthetic suits are designed to prevent accidental transfer of viruses and bacteria to the wearer. They allow wearers to work and move freely among patients. These bodysuits are usually made of a fluid- and air-resistant woven plastic fiber. The suit prevents exposure to body fluids and infectious agents, but it must be removed carefully to avoid contact with pathogens on the fabric. Bodysuits may offer better protection, health care experts say. These are recommended to be worn by people providing regular care for people with COVID-19.

PROTECTIVE BODY SUITS

| CODE | BODY SUITS-L (Large) | BODY SUITS-M (Medium) |

Product Description:
Synthetic Body Suits made from fluid- and air-resistant woven plastic fiber
Excludes boot covers.
Protect the exposed sides and areas around your eyes. Safety glasses are recommended for people who will be providing regular care for people with COVID-19. Whilst patients’ eyes are rarely symptomatic in COVID-19 and conjunctival secretions rarely test positive for the virus, the mucous membranes of the healthcare worker (including eyes) may be exposed to respiratory droplets from the patient. For this reason, eye protection equipment should be used for primary and community care when assessing patients with possible infections. Eye protection is most effective when used in combination with other PPE measures in this situation and for protection against any blood or other body fluid splashes that may occur with procedures.

**PROTECTIVE BODY SUITS**

FACE SHIELDS FOR PROTECTION AGAINST INFECTIOUS DISEASES

Face Shields protect the facial and mucous membranes of the wearer from splashes, sprays of bodily fluids that may prevent the wearer from contracting an infectious disease. It also protects workers from contact with splashes and splatters of fluid-borne pathogens from patients. This is especially vital near. These are designed to protect the entire face and protective masks and safety glasses can be are worn beneath.

**CLEAR FACE SHIELD**

**FACE SHIELD**

**Product Description:** Clear Face Shield with comfortable headband to allow easy fit

**CLEAR FACE SHIELD WITH DOUBLE HEADBAND**

**FACE SHEILD-A**

**Product Description:** Clear Face Shield with comfortable double headband and adjustable elastic to allow easy fit
DISPOSABLE & REUSABLE FACE MASKS
TO AVOID GETTING ILL OR SPREADING GERMS
3 PLY NON-Sterile & Surgical Masks for Respiratory Protection

Wear a protective mask and cut the chance of catching or spreading unwanted germs. Before putting on a mask, clean hands with alcohol-based hand rub or soap and water. Cover mouth and nose with mask and make sure there are no gaps between your face and the mask. Avoid touching the mask while using it; if you do, clean your hands with alcohol-based hand rub or soap and water.

Cover mouth and nose with mask and make sure there are no gaps between your face and the mask. Avoid touching the mask while using it; if you do, clean your hands with alcohol-based hand rub or soap and water.

**Product Description:** Disposable face mask with air vent and metal strip for custom fitting

**NOTE:** ORDERS CONFIRMED & SHIPPED ON RECEIPT OF PAYMENT ONLY
The use of ‘fabric’ face masks as an additional preventative measure against COVID-19 has been recommended for public use by the National Department of Health (NDoH). The spread of COVID-19 is mainly via respiratory droplets produced when an infected person coughs or sneezes, similar to how influenza and other respiratory pathogens spread. Therefore, wearing a fabric face mask is added as a prevention measure to help limit community transmission of the virus.

DISPOSABLE HAND GLOVES
TO WEAR WHEN CARING FOR OTHERS
**DISPOSABLE HAND GLOVES WHEN CARING FOR OTHERS**

Wear hand gloves if you are providing care to sick people at home or in another non-healthcare setting and when disinfecting the area around the sick person or other surfaces. Gloves are essential when touching or having contact with blood, or other body fluids in medical environments. Do not disinfect or reuse the gloves and ensure to wash your hands after you have removed the gloves.

HANDS FREE ACCESS CONTROL
TO LIMIT THE ITEMS YOU TOUCH
Hands Free Access Control to Limit Touched Items

Don’t touch it, if you don’t need to! Since social distancing is extremely critical to prevent the spread of COVID-19, limiting the items we touch around the office is important. There are ways you can get into your premises without touching keypads or card readers. Instead of touching the card reader with your hands use an inanimate object like your phone or a covered body part like your elbow or arm or just install automatic readers for total hands-free access.

**No Touch Stainless Steel Exit Button**

**Product Description:**
No Touch Access Reader with white plate
IP40 | 12VDC | NO & NC 3A@12VDC
Infrared Sensor: 50mm Sensing
THINK ELECTRICAL

NON-CONTACT SCREENING EQUIPMENT
FOR MEASURING HIGHER THAN NORMAL TEMPERATURES
Are you hot? That’s essentially what these thermometer guns and other similar infrared body temperature measuring devices are trying to determine. You may have noticed an increased use of such devices at airports and other checkpoints with the ongoing COVID-19 coronavirus outbreak. The purpose of these devices is to measure your body temperature without using an old fashioned thermometer orally. There are many ways infected people can slip through the net. Thermal scanners and thermometers are great for screening people with higher than normal body temperatures to avoid potential virus transmissions.

**NON-CONTACT DIGITAL THERMOMETER**

<table>

- Field of View: 36°
- Flashlight: 300lm LED
- Storage: MicroSD Card Included

**REVEALXR THERMAL IMAGING CAMERA**

Product Description:
The single-handed interface and button control makes it ideal for public safety professionals.

- Thermal Sensor: 206 x 156
- Detection Distance: 275m
- Field of View: 20°
- Flashlight: 300lm LED
- Storage: MicroSD Card Included

* Add colour to Code: B (Black), C (Camo)
Highest resolution, most full-featured thermal imaging camera in its class. Seek Shot is the most advanced thermal imaging camera for building professionals. Capture a photo and analyze it immediately with on-device measurement tools. Add spot measurements and temperature boxes to create time-saving reports on the spot. Precisely diagnose problems with 5 to 15 times higher resolution than comparably priced cameras. Use SeekFusion to expose problems with adjustable blending of visible and thermal images. Additionally, Seek Shot lets you stream and share with a smartphone or tablet over WiFi.

**REVEAL PRO THERMAL IMAGING CAMERA**

- **Product Description:** High-Resolution Thermal Sensor. Rugged, rubberized casing with Corning® Gorilla® Glass
  - Thermal Sensor: 320 x 240
  - Detection Distance: 550m
  - Field of View: 32°
  - Frame Rate: <15Hz FastFrame in Normal MODE
  - Flashlight: 300lm LED
  - Storage: 4GB Internal Drive

**REVEAL SHOTPRO THERMAL IMAGING CAMERA**

- **Product Description:** More pixels, more precision - more resolution than the competition. Best in class thermal resolution
  - Thermal Sensor: 320 x 240
  - Field of View: 57°
  - Temp. Range: -40°C to 330°C
  - Storage: 4GB Internal Drive
