UPGRADE THE EFFICIENCY AND STYLE OF YOUR HOME WITH THE ASPECT 14 ECO BOILER STOVE.

This contemporary boiler stove is both practical and extremely desirable, adding ambience to the room alongside its powerful Tripleburn® technology which simultaneously heats the room and the water for your home. The Aspect 14 Boiler Stove heats the hot water for your home quickly and efficiently whilst providing a magnificent centrepiece for your room with its impressive glass viewing window. One of its key features is the extremely low levels of CO emissions which it emits whilst providing a generous heat output to the room.

ECO BOILER STOVE

PARKRAY CONTEMPORARY RANGE

TRIPLEBURN® TECHNOLOGY

The three streams of air cause an incredibly efficient burning of the fuel, which results in an increased heat output, less smoke and a cleaner environment.

DIRECT AIR / EXTERNAL AIR

All of our Aspect stoves come with the option of a direct air kit. Please note that these are not room sealed.

DEFRA SMOKE EXEMPT

This stove has been tested and passed the UK Government's Defra criteria for emission levels and the amount of smoke that it will be allowed to produce during all stages of normal operation

SELF CLEANING GLASS

Our innovative airwash draws air down from the top of the stove, heats it up in the central air chamber and sends it down behind the glass door, creating a screen between the fire and the glass. Smoke or combustion particles do not come into contact with the glass meaning that you do not need to clean it.

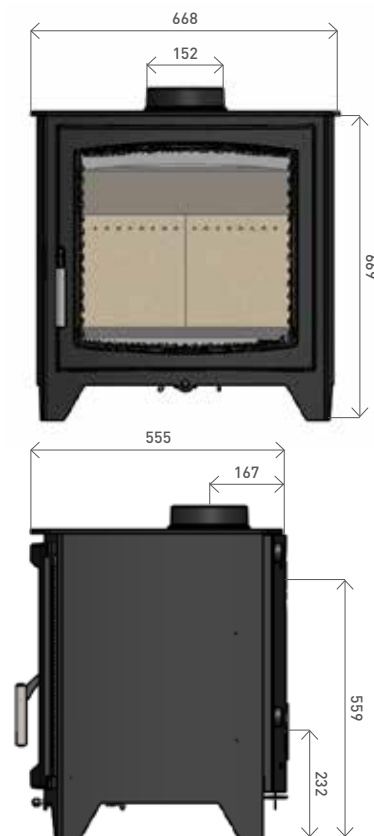

PLINTH

You can choose to have your Aspect 14 Eco Boiler Stove fitted on a log plinth, which raises it up off the floor and provides a handy place to store your wood. Stoves fitted on plinths can be installed on a 12mm hearth when freestanding.

H225 x D539 x W667

DIMENSIONS

* All dimensions are in mm.

HOT WATER STORE

8-14 radiators*. Suitable for open vented systems.

* Number of radiators is dependent on system size.
