Lifestyle

appliances limited

Lifestyle Appliances Limited was formed in 2001, and is one of the largest independent suppliers of Outdoor Leisure products in the UK market today.

Lifestyle Appliances has an enviable reputation renowned throughout the industry for supplying quality products and has an excellent after sales support. This is evident for both our Industrial and Leisure products which gives unparalleled reassurance for both our wholesaler and their customers.

Lifestyle Appliances Head Office is situated in Redditch, Worcestershire. This is also the location for the warehouse and distribution operation which is ideally situated at the heart of the transport network enabling Lifestyle to offer next day deliveries and a 2/3 day service on palletised quantities. 6 years ago saw the acquisition of our own vehicle and 5 years ago saw the purchase of our own Lifestyle 40ft articulated vehicle to further enhance the ability to offer a prompt and reliable service.

Over the years Lifestyle Appliances have broadened their product range to include gas and charcoal Barbecues, gas and flame Patio Heaters, pressed steel Firepits, luxury wicker Picnic Hampers, an electric Outdoor Party Cooler, Garden Furniture, Cabinet Heaters, Greenhouse Heaters, Outdoor Leisure Accessories and an extensive range of industrial LP Gas equipment, which can be found in our comprehensive Industrial Catalogue.

Our Extremely popular Flame Heaters are ideal for the hospitality & catering industry, hire companies and domestic consumer and run alongside our full range of quality gas bbqs and other Outdoor Leisure products.

For further information on any of our products, please do not hesitate to contact a member of our sales team on **01527 65126** or send your enquiry to **sales@lifestyleappliances.co.uk**.

Product Codes:
10kW - LFS923
15kW - LFS924
30kW - LFS925

The units are light weight and easy to carry. Cool-touch housing protects the user if moving the heater. The heaters operate on Liquid Petroleum Gas (LPG).

A powerful fan forces air through the combustion chamber. As the air passes through the burner, all heat released by the combustion process is transferred to the air stream.
