

MIX KIT RATIO SHEET

CREATE ONE HIT WONDER PAINT COLORS AND YOUR OWN CUSTOM SHADES.

INCLUDES

One quart* each of Black, White, Yellow, Red and Blue; a Measured Mixing Cup, a Measured Syringe and a Mix Kit Ratio Sheet.

DIRECTIONS

The measuring cup is marked 1-10. Each unit represents 10%. When creating your color, add the biggest percentage first. Use the syringe for smaller amounts. Pigments are strong so add too little rather than too much. You can always add more later. **STIR AS YOU GO.**

All paints are spray-ready so no additional reducer is needed. However for airbrushes or colder climates feel free to add reducer as desired.
