EXPERTISE

PROTECTING YOUR WINE

ArteVino relies on the expertise of the EuroCave Group to design its wine cabinets with the highest level of requirements. Benefit from the perfect environment for correctly ageing your wine:

HIGH QUALITY MATERIALS

To ensure the best performance, ArteVino uses sustainable and high quality materials for the body and equipment of its wine cabinets. Inner walls in aluminium, reinforced insulation and wooden shelves.

Made in France

Manufactured in Fourmies (North of France), in the Eurocave Group factory, the world expert in wine storage and serving solutions.

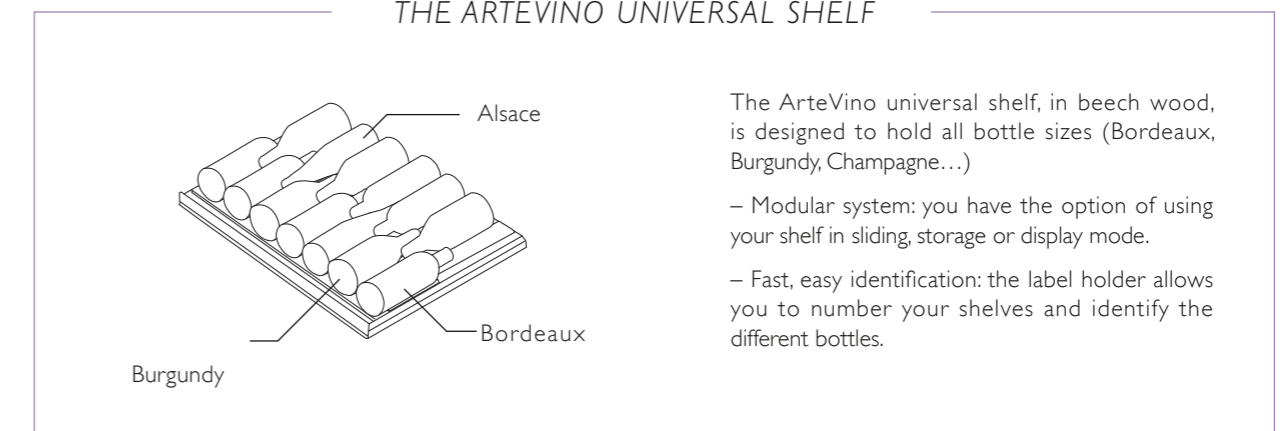

MODULARITY & ERGONOMICS

ONE SHELF, SEVERAL USES

As a real specialist, ArteVino has fitted all its range with universal shelves. These beech wood shelves can hold all bottle sizes and change from storage to sliding or display mode. Optimal storage flexibility and quality!

THE ARTEVINO UNIVERSAL SHELF

STORAGE SHELF

Designed for a maturing cabinet to store a large number of bottles, for which regular access is not necessary.

It optimises the cabinet's capacity.

SLIDING SHELF

Designed for a serving cabinet or to offer quick and easy access to some bottles.

This format ensures optimal protection of labels by preventing scraping, and easy access to all bottles.

DISPLAY SHELF

Designed for a serving cabinet or maturing cabinet fitted with a glass door.

This format allows you to display the labels of your most prestigious bottles.

VERSATILITY

MEETS ALL YOUR REQUIREMENTS

MATURING CABINET

Use : For storing and maturing wine for a period of 2 to over 20 years. Wine maturing cabinets recreate the ideal conditions found in a natural cellar to meet the 6 criteria required for optimal wine maturing.

Features : A single, adjustable temperature, uniform throughout the cabinet (ideal temperature for maturing all wine: 12°C).

WINE SERVING CABINET

Use : Whilst wine is stored at 12°C, it is not necessarily drunk at this temperature. The serving or multi-temperature cabinet allows you to store your wine for a period of up to 2 years, at an ideal serving temperature. Can be used for all types of wine.

Features : A temperature gradient throughout the cabinet from 6°C for cooling to 20°C for bringing your red wines to room temperature.

MULTI-FUNCTION CABINET

Use : One wine cabinet for many uses. For storing and bringing wine to the correct serving temperature.

Features : 3 separate compartments:

- A central compartment for storing wine.
- A lower compartment for cooling wine.
- An upper compartment for bringing your red wine to room temperature before serving.

MULTI-DRINKS CABINET*

Use : Maturing your wine and bringing all types of cold drinks to the correct serving temperature (champagne, fizzy drinks, beer, fruit juice) is now possible with the multi-drinks wine cabinet.

Features : 2 separate compartments:

- An upper compartment for storing and maturing wine.
- A lower compartment for preparing all types of cold drinks for serving.

*This wine cabinet is not available for the EU countries
