

From The Heart

Brought to you by SafeGuardian™

Around the Clock Monitoring with our State-of-the-Art Call Centers

SafeGuardian is adding yet another layer of protection for its clients.

Our 3 US-based, fully-redundant emergency monitoring centers are Five Diamond certified with employees standing by to help 24 hours a day, 7 days a week. The centers can dispatch emergency services, call doctors or other contacts, and will have access to important medical information.

We offer this crucial additional service for just an additional \$10 a month for all Help+Alert™ devices. Contact us to learn more!

Charging Stands that Keep You Connected

All Help+Alert™ devices now come standard with our brand new backup battery, bluetooth-enabled charging stands.

Our new-and-improved tabletop chargers feature a backup battery that will charge the Help+Alert, should a user be without power or traveling. Additionally, it's packed with features like voice prompts that tell the user when the device is charging, a standalone SOS button that can send out alerts, and bluetooth pairing with the Help+Alert device.

Help+Alert™ in 4G!

Same price, even better features!

Lastly, SafeGuardian is happy to announce that all Help+Alert devices now run on the nation's largest 4G LTE network. This means even more clients can now enjoy the protection of the Help+Alert without the fear of being too far from cellular or GPS reception.

What You Do to Reduce Loneliness

Various surveys of older Americans have found that between 33% and

43% of them are lonely. But we wanted to find out how lonely, what makes them feel lonely, when they feel lonely and, most important, what they do to feel less lonely. - Next Avenue
