CareCaller™ LTE with Bluetooth charging stand

New 4G CareCaller™ LTE Available Nov. 15

The time has come for the release of SafeGuardian's most advanced device yet! The CareCaller™ LTE — our new 4G LTE-powered help alert — is available for preorder now with shipments starting Nov. 15.

The CareCaller™ LTE boasts new features like advanced 4G LTE cellular coverage, innovative voice prompts, Bluetooth charging base with call button and backup battery, Find My CareCaller™ commands, and so much more.

For more information, read the full press release [here](#). And follow the link below to preorder yours now!

[Preorder Now](#)

Providing *peace of mind*

- ✓ One-touch Help Alert calls
- ✓ Five emergency contacts
- ✓ Built-in GPS locator
- ✓ Fall alerts by text message
- ✓ 24/7 monitoring available

Request Our New Brochure

In support of the release of the CareCaller™ LTE, SafeGuardian has created a new promotional brochure, detailing the features and benefits of the device, accompanied by helpful graphics and photos.

These are free to all SafeGuardian affiliates for distribution and marketing purposes. To download your own, follow the link below. We've purposely left the back panel blank for individual agencies to imprint their own contact information and unique affiliate link.

Even better: We've included a promo code for one (1) free month of service!

4G Features: Voice Prompts

One of the most exciting new features of the CareCaller™ LTE are the innovative voice prompts. During such events as a fall detection, an SOS alert, an incoming phone call, a low battery alert, etc., the CareCaller™ LTE's voice prompts will announce to the wearer exactly what is happening.

To see the voice prompts, as well as other new CareCaller™ LTE features in action, watch our new video at the link below.

Taking Blood Pressure Medicine at This Time of Day May Lower Stroke, Heart Attack Risk

It might be worth taking your blood pressure medicine before bedtime, instead of first thing in the morning, a new study suggests.

The study, published Tuesday in the peer-reviewed *European Heart Journal*, found that taking blood pressure-lowering medications "at bedtime, as opposed to upon waking" may stabilize blood pressure at night and throughout the day, reducing the chance of heart attack, stroke and death. - USA Today

Getting Your Medicare Drug Coverage Right During Open Enrollment

Photo: Getty Images

If you're on Medicare, now's the time to closely evaluate your 2020 prescription drug coverage. The program's annual open enrollment period, when you can make changes that take effect Jan. 1, is under way and closes Dec. 7. With plans varying from year to year, you could be setting yourself up for financial woes if you don't review your options. - CNBC
