

Time & Attendance Suite

Tired of paper time sheets?

Spending hours shuffling through paper timesheets? Combine BundyPlus Time & Attendance software with any G6-Series time clock and you'll have timesheets done in seconds saving you precious time and money!

How does it work?

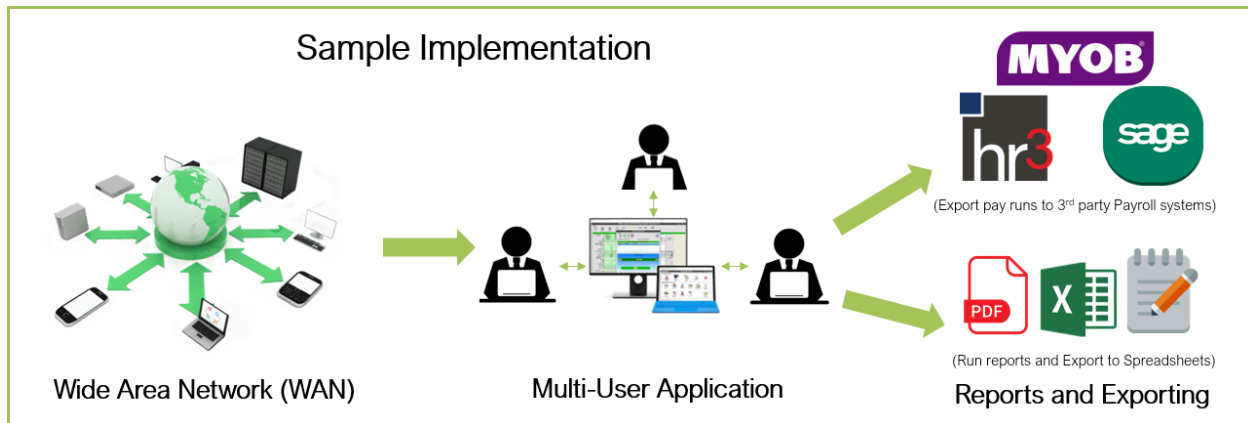

BundyPlus does all the running around for you. Collating employee clockings from your time clock(s), storing them into a central database. Once in the database, payroll administrators can easily assign ordinary time, overtime and other time types automatically whilst production managers can review employee timesheet information in real time.

Losing endless hours sorting and calculating employee's time spent on specific jobs? Combine BundyPlus Business Edition with any barcode enabled G6-Series time clock and you'll have employee billables done in no time!
