

# Combi Green™

Seaweed Compound Granular Turf Fertiliser with Slow Release Nitrogen

17(6Mu) - 2.15 - 8.3 + 5% Seaweed

**Combi Green seaweed compound granular fertiliser is the perfect combination of seaweed extracts, slow release nitrogen (methylene urea) and other nutrients essential to healthy turf.**

- Seaweed Extract provides a natural source of essential substances, and is rich in minerals such as calcium, magnesium and iron, as well as several natural seaweed plant growth regulators.
- Methylene Urea is a slow release form of nitrogen. Having low water solubility, it releases nitrogen slowly under the influence of soil microbes.

## BENEFITS

- Complete turf nutrition and microbial activity enhancement in one application.
- Slow release nitrogen provides uniform growth between each mowing interval.
- Slow release nitrogen reduces the leaching of nutrient into the environment.
- Seaweed Extract increases the biological activity of beneficial microbes, improving the chemical and physical properties of the soil.
- Available in both Fairway Grade for regular turf maintenance, and a much finer Greens Grade for use on fine turf.
- Both grades are fully homogenised granules of uniform size and consistency which makes their application quick and efficient using any regular spreading method.

## PRODUCT INFORMATION

### GUARANTEED ANALYSIS

#### 17% TOTAL NITROGEN (N)

3.6% as ammoniacal nitrogen

7.4% as urea nitrogen

6.0% as methylene ureas

#### 2.15% PHOSPHORUS (P)

#### 8.3% POTASSIUM (K)

1.8% MAGNESIUM (Mg) as magnesium oxide

2.1% CALCIUM (Ca) as calcium oxide

0.10% Iron (Fe)

0.02% Zinc (Zn)

### APPLICATION RATE:

20-40g/m<sup>2</sup>

Bag coverage: 20kg for 500-1000m<sup>2</sup>

### APPLICATION NOTES:

Product must be watered in after application. Repeat Application every 2-3 months.

**LONGEVITY:** Approx. 90 days

**PACK SIZE:** 20kg
