Protective engineering solutions should be implemented and in use before personal protective equipment is considered. Ensure that eyewash stations and safety showers are close to the Appropriate engineering controls: workstation location. Ensure adequate ventilation. Eye / face protection: Use chemical splash-type goggles. Face shield. Hand protection: For hand protection, wear approved gloves made of nitrile, PVC, or neoprene. Thoroughly rinse the outside of gloves with water prior to removal. Inspect regularly for leaks. Other skin and body protection: For body protection wear suitable protective clothing. **Hygiene measures:** Avoid breathing vapors, mist or gas. Clean water should be available for washing in case of eye or skin contamination. **Respiratory protection:** If concentrations in excess of 10 ppm are expected, use NIOSH/DHHS approved self-contained breathing apparatus (SCBA) or other approved air-supplied respirator (ASR) equipment (e.g., a full-face airline respirator (ALR)). **Environmental exposure controls:** Eye bathing equipment should be available on the premises. Provide quick-drench showers and washing facilities accessible to areas of use and handling. Have supplies and equipment for neutralization and running water available.
