

FUORA
Outdoor fireplaces

About our outdoor fireplaces

Area of use

Operation of FUORA fireplaces is only permitted outdoors!

Product description

- The powder-coated base made of aluminium plate/stainless steel or steel does not only create the ideal height for the firelight, but provides sufficient space for placing standard liquefied gas bottles inside the unit.
- In addition, there is the option of a natural gas connection for the FUORA R, Q, G and K models.
- Due to the gas bottle, for a period of up to 24 hours the unit will display an idyllic flame pattern.
- Since they are easy to install and operate, FUORA outdoor fireplaces can be put into operation quickly and used to great effect.
- 2 rollers allow for an easy and convenient transport of the units.
- Practical recessed grips for convenient handling of this high-quality fire unit.
- Adjustable flame height: the flame heights are adjustable at will for the maximum enjoyment of your fireplace.
- A weather protection cover is available for all fireplaces.
- A customised engraving can be included on the flat panes of the fireplaces Q, Q-XL, G and K.

Key:

Operation only outdoors

Gas type: natural gas G20

Transport rollers on the appliance

Gas type: natural gas G25

Gas type: natural gas G30/31

Detailed description with the example of a FUORA Q

Cover

Heat-resistant glass lid

Combustion chamber

Panoramic all around view of the flames

Base

Housing for holding the gas bottle; high quality housing made of powder-coated material (FUORA R), aluminium (FUORA Q/Q-XL) or steel (FUORA G/K)

FUORA R

The slender shape of the FUORA R is captivating. The Outdoor fire-place made of glass and stainless steel does not only create the right atmosphere for every occasion but pleasant heat as well. The large panorama glass provides a 360-degree view of the flames.

The flames and the amount of heat, can be conveniently regulated by a rotary pushbutton. The base is available in white or Nero. Relax and unwind. Fire enjoyment that lasts for hours.

FUORA Q

The FUORA Q made of glass and powder-coated aluminium captivates with its straight-line design. The panorama glass offers an all around view of the flames and radiates cosy warmth.

So pleasant evenings can continue until late, and summer on the terrace can last right into late fall. This outdoor fireplace is easy to move around thanks to the two practical rollers and its recessed lateral grips.

FUORA G | FUORA K

With an outdoor fireplace on your terrace the evening is bound to be a perfect one. An extraordinary new design to stage the dancing flames. These fine outdoor fireplaces are over 2.20 metres high and come in appealing black. The central feature is the circular combustion chamber located perfectly at eye level when you sit down in front of it. A modern design using straight or convex panes to showcase the flickering flames. Design freedom with flexible glass-ceramic.

FUORA G and K - both models provide the best possible view of the fire and are absolute eye-catchers on your terrace at home or on any hotel or restaurant terrace.

Individualise your outdoor gas fireplace by having something personal engraved on the flat pane. Perhaps your name? An elegant word? An inspiring quotation? Let your imagination run wild!
